MODEL GARDEN CLUB, Paw Paw, Michigan

Grow Strawberries for Quick Profits

Strawberries will succeed in any soil that is adapted to ordinary farm or garden crops. Soil should be thoroughly stirred to a good depth, well drained and enriched. Rotten straw, wood soil, wood ashes, etc., are best. For field culture set in rows 3 to 3½ feet apart and set 15 to 18 inches apart in the rows; for garden 15 inches apart in rows and rows 2 to 3 feet apart. For the best fruit keep the runners pinched off as fast as they appear and keep in hills. Ground should always be kept clean and well cultivated. In Winter a mulch of leaves, straw, or some kind of litter will protect the plants, but do not cover until the ground is frozen, or so deep that it will smother the plants, and remove covering before growth starts in the Spring. Mulching will keep the fruit clean and will aid in bringing forth large healthy berries.

The Model Garden Everyield New Champion Everbearing Strawberries.

Everyield New Champion Everbearing Strawberry

This sterling variety makes new Everbearing Strawberry enthusiasts every year. It is the first Everbearer to overcome that common fault of the everbearing strawberries—that of running small after the first picking. A hundred plants will supply your table with this delicious berry through Summer and Fall, and will give you hundreds and hundreds of new plants that you can set out or sell to your neighbors at good prices.

PRICES: 25 for \$1.00; 50 for \$2.00; 100 for \$3.50, postpaid.

Premier

The Earliest and Best Strawberry.

Premier is the French word for first, and that is what we mean by the Premier Strawberry. First to bear, first in size, first in quality, first in crop and first in genuine goodness. This wonderful new Strawberry is by far the earliest and best on the market. A perfect flowering variety, it will yield three crates to one of other varieties. It is very frost resistant and the large, firm fruits are ideal for shipping to distant markets. If you want a big, early, money-making Strawberry, plant Premier.

PRICES: 25 for \$1.00; 50 for \$1.75; 100 for \$3.00, postpaid.

St. Regis Everbearing Red Raspberries.

Cooper

This is the Strawberry that meets the demand for a berry of large size combined with productiveness. It is the largest berry grown and one of the heaviest bearers. An excellent berry for both home and market use. Insist on genuine COOPER plants wherever you buy.

PRICES: 25 for \$1.00; 50 for \$1.75; 100 for \$3.00, postpaid.

Senator Dunlap

Everybody knows what the Senator Dunlap will do and what a dependable variety it is. The Dunlap Strawberry does well on all kinds of soil, is an excellent variety for beginners and one of the very best for home gardens. Medium early. Delicious fruit.

PRICES: 25 for 50c; 50 for 85c; 100 for \$1.50; 1000 for \$7.00, postpaid.

Dr. Burrill

The Million Dollar Strawberry.

Dr. Burrill is one of the best general purpose Strawberries ever produced. It is commonly known as "The Improved Senator Dunlap," which is recommendation enough for anyone. Dr. Burrill produces more berries than Senator Dunlap, bigger berries and of better quality. It is a strong pollinizer of an unusually long fruiting season. On account of its extra long, sturdy roots, it is able to produce a full crop of fruit, regardless of rainfall, for it can draw soil moisture from a greater depth than the average Strawberry. Be sure to include a few of these plants in your order.

PRICES: 25 for 50c; 50 for 85c; 100 for \$1.50; 1000 for \$7.00, postpaid.

St. Regis Everbearing Red Raspberry

A fairly new variety that has proven itself to be one of the best everbearing Red Raspberries ever produced. The value of the St. Regis lies in the fact that it will produce a full crop of fruit in the Spring and then will commence bearing on the new canes, producing ripe berries all through the Summer and Fall until frost comes. For the market garden it is unrivalled and will produce large clusters of ripe berries as late as September which find a ready sale for \$7.00 or more for a 24-pint crate. Be sure to plant at least a few of these bushes and keep your table supplied with berries all Summer.

PRICES: 12 for \$1.00; 25 for \$1.50; 100 for \$4.50, postpaid.

clogged, and the whole body is "sick." As the entire system becomes "run-down," disease germs find easy entrance.

ACID-EAZ KILLS THE ACIDS

The acid poisons caused by indigested food in the stomach must be eliminated, and for this purpose ACID-EAZ is unexcelled.

Taken in water, as directed, ACID-EAZ searches out, destroys and expels the acid poisons, and hastens the recovery to health.

ACID-EAZ goes to the source of the trouble and affects permanent relief by removing the cause of the trouble.

ACID-EAZ is composed of the most easily assimilable forms of Magnesium, Sodium and Calcium, in the correct proportions. All three elements are "antacids," or enemies of acid. Calcium is an absorbent of gases, and Magnesium is a gentle laxative. The three, in their proper proportions form a scientific remedy for all troubles arising from an acid condition of the body, —called "Acidosis," or "Hyperacidity."

If the use of ACID-EAZ results in a feeling of fullness or suffocation, take a level teaspoonful briskly stirred in hot water, every fifteen minutes until the gas is expelled.

The regular daily use of ACID-EAZ should be continued until the "Blue Litmus Paper" remains blue when wet in the mouth on arising in the morning.

Disease Usually Starts in the Stomach.

Nearly all diseases and troubles of the internal organs start in the stomach. This is also true of Rheumatism, Neuritis, and other Nerve and Muscular disorders.

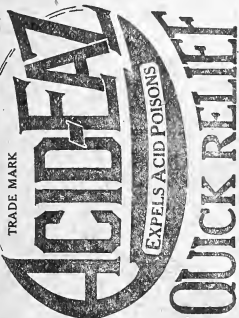

When the Stomach and Bowels are in a condition of health, the food is easily and quickly digested, and the body is supplied and nourished by an abundant supply of rich, pure blood.

When pure blood is supplied to the muscles, organs, nerves and brain, disease finds it difficult to enter the body, as pure blood is sure death to disease germs. But when the stomach gets "out of order," and cannot properly digest the food, the blood becomes impoverished, and trouble finds easy entrance.

Acid Poisons Cause Serious Troubles.

Food that remains in the stomach undigested starts to ferment and to form poisonous acids. These acids give rise to gas, causing bloating and belching. The acid or "sour stomach," is the first symptom of "Indigestion." It causes intense distress, a foul breath, and a sick-to-the-stomach feeling.

These poisonous acids in the stomach are absorbed into the blood, and are carried all over the body, causing trouble to other organs and to the nerves. The nerves become irritated and "unstrung," the liver torpid, the bowels

DOSE. A level teaspoonful in a half glass of water.

For Disorders of the Stomach, Intestines, Liver and Kidneys, ACID-EAZ should be taken four times daily, a level teaspoonful one hour before each meal and at bedtime.

For Rheumatism, Neuritis, and all other chronic pains of the muscles and joints, ACID-EAZ should be taken three times daily, one hour before meals or two hours after.

The fame of **CELTONA** as a builder of Steady Nerves, Good Digestion, Pure, Rich Blood and Bodily Vigor is well merited.

This wonderful preparation contains all the elementary mineral "Cell Salts" that each cell of the human body requires.

One-third teaspoonful, four times daily, supplies the system with all the mineral requirements of the bone and sinew, nerves and brain.

The Chlorates, Phosphates and Carbonates of Sodium, Potassium, Magnesium and Calcium represent the twelve "Salts of Life" that nearly all the tissue cells require, in order that they may remain healthy, and be able to do the work required of them.

In addition to these main elements of life, **CELTONA** contains all the other minerals such as Iron, in its various forms, Silicon, Iodine, etc., that are used in lesser quantities, but which are very important.

Nervous Diseases are usually due to an insufficiency of Calcium, Phosphorus and Iron, and these disorders are easily remedied by supplying the missing salts.

Digestive Disorders quickly yield to **CELTONA**, and an "easy digestion" soon results.

Impoverished blood cannot sustain the bone and sinew, nerves, brain, blood-vessels and organs. **CELTONA** supplies the blood with the proper amount of each kind of "Cell Food," and the purified, enriched blood carries the nutritive elements to every part of the body.

CELTONA can be profitably used by young and old. It is perfectly harmless in any quantity. It is not a "Patent Medicine" but a concentrated Tonic Food. It can be used, with good results in infant-feeding, by substituting for salt, in the preparation of its food.

FOR TABLE USE

A very good plan, and one that can safely be recommended, is to fill the salt-cellar with **CELTONA** in place of common salt. If used in cooking, and on the table as recommended, all the mineral or "inorganic cell salts," will be supplied through the food.

For this purpose the "Family Size" package is recommended as this large size contains sufficient **CELTONA** to last an ordinary family for several months.

IMPORTANT.—Rapid recovery to Perfect Health is hastened, if the system is first cleansed of acid poisons. For this purpose we recommend **ACID-EAZ**, the great 'Antacid.' **ACID-EAZ** searches out the poisonous acids, and quickly neutralizes them and expels them from the system.

CELTONA and **ACID-EAZ** are put up in three sizes, at Sixty Cents, One Dollar and \$1.75, and will be sent on receipt of price by the sole Makers:

JOHN W. FREE STATE BANK

CAPITAL STOCK \$10,000 SURPLUS \$10,000

PAW PAW, MICH.

Sept. 19th, 1925

To Whom It May Concern:

We are pleased to say that in our judgment the Model Garden Club are financially responsible. This institution has done business with us for several years and we are personally acquainted with the management. The business is being conducted in a businesslike manner.

We believe that no one need hesitate to forward money to this Company, and if they do so, they will promptly receive the goods purchased in return for their money.

Very truly yours,

JOHN W. FREE STATE BANK

By

President.
The First National Bank

CAPITAL AND SURPLUS \$100,000.00

Paul Paw, Mich.
Sept. 12, 1925.

TO WHOM IT MAY CONCERN.

We are acquainted with the management of the Model Garden Club and they are considered competent, honorable and reliable. It is a pleasure to recommend it.

Very truly,

President.

EFC/AMM

AMERICAN RAILWAY EXPRESS CO.(INCORPORATED)
CHICAGO, U.S.A.

Paw Paw, Mich.

Sept 22-25

To whom it may concern:

Having had a large volume of business from the Model Garden Club, all of which has been highly satisfactory, I can heartily recommend them to take care of any and all obligations promptly and efficiently.

H. H. Goulman,
Agent.**United States Post Office**
PAW PAW MICHIGAN.September
19th. 1925

To whom it may concern:

Being personally acquainted with the Model Garden Club Company of Paw Paw, Michigan, I have no hesitancy in recommending them to the public. This Company is reliable, responsible and treat their customers with courtesy, honesty and dispatch.

Respectfully,

Postmaster.

These Suggestions Will Help You in Making Out Your Order

PLEASE USE THE ORDER BLANK

Whenever possible, listing all of the items of nursery stock on one side and all of the items of seed on the other side. Please do not write on the order blank for information, to do so will delay the filling of your order.

GIVE YOUR FULL ADDRESS.

The name and address are both so frequently omitted from the order that a good rule to follow is to **WRITE YOUR NAME AND ADDRESS FIRST**, and then make out your order.

HOW TO SEND MONEY.

Use a post office order or check whenever possible or an express order. These methods are safe and you are protected in case of loss. Never send coin or currency in the mail unless in registered letter.

We do not send goods C. O. D. Cash must accompany your order.

WE CANNOT SUPPLY ANYTHING NOT LISTED.

We have included only those items which have proven worthy in this catalog. We will add to our list in the future as demands may require and our ability to supply additional items increases.

SEEDS AND NURSERY STOCK ARE MAILED SEPARATELY.

Seeds require a DRY package, while nursery stock requires MOIST packing. So, we make separate packages of Seeds, Strawberry Plants and Nursery Stock. All seed orders are filled upon receipt of order after which the order is sent to the Nursery Department to be completed, therefore, do not write us just because you receive your seeds, but not your Nursery Stock as this portion of your order always follows the Seeds.

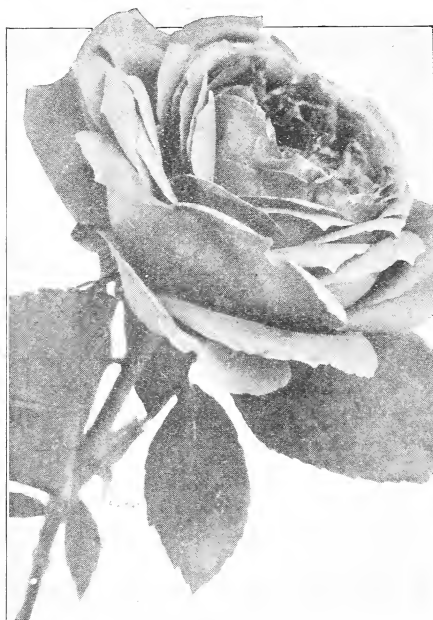

Read Our "Model Garden Club" Guarantee

WE GUARANTEE our Nursery Stock and Seeds to reach the purchaser in vigorous growing condition and will replace any stock or seeds arriving in poor condition upon written statement from the express agent or postmaster, if notified within five days after receipt of shipment, otherwise we will assume that the stock arrived in good condition.

We will replace any tree or plant that dies the first season, at a cost of one-half of the catalog price, provided notice and order for replacement are received by us on or before September 30th, following the date of purchase.

WE GUARANTEE that all Nursery Stock has been inspected by a State Inspector, while growing in the field and that it is free from disease or insect infestation, and that all Seeds have been rigidly inspected and tested for purity and germination. We exercise greatest care in labeling and handling all stock and seeds and it is agreed that we shall not be liable, in case of error, for more than the original purchase price.

Hardy "MODEL GARDEN" Roses

Paul Neyron Rose.

MADAME MASSON. Blooms nearly all the time, bearing numbers of large, full, double flowers of unusual beauty and wonderful fragrance; clear, bright rose; very attractive and striking. First size, 1-yr. plants, 30c each; 2-yr., 65c, postpaid.

PAUL NEYRON. The largest Rose ever produced, sometimes measuring six inches across. In color, it is a most beautiful clear rose-pink and of delicious distinctive fragrance equal to that of American Beauty. Stems almost thornless and grows very rapidly. First size, 1-yr. plants, 30c each; 2-yr., 65c, postpaid.

WHITE AMERICAN BEAUTY. This Rose is renowned as the very highest type of its class and the best snow-white Rose ever produced. Each plant produces hundreds of immense pure white flowers 4 to 5 inches across. A vigorous grower and very hardy. First size, 1-yr. plants, 30c each; 2-yr., 65c, postpaid.

Hardy Climbing Roses

CLIMBING AMERICAN BEAUTY. A sturdy, vigorous grower immune to insects and disease. Roses from 3 to 4 inches across grow on individual stems and it possesses the same wonderful fragrance of the old American Beauty. First size, 1-yr. plants, 30c each; 2-yr., 65c, postpaid.

CRIMSON RAMBLER. The most popular climber of today; a rapid producer of long heavy canes, reaching a height of ten to twenty feet in one season; rich clusters of bloom form a mass of vivid crimson beauty until late in the season. Perfectly hardy. First size, 1-yr. plants, 30c each; 2-yr., 65c, postpaid.

DOROTHY PERKINS. Beautiful shell pink color, which holds for a long time, fading finally into a deep, rich rose; very sweet scented and fully equal to Crimson Rambler in hardness, habit of growth and blooming qualities, while superior in foliage. First size, 1-yr. plants, 30c each; 2-yr., 65c, postpaid.

THOUSAND BEAUTIES (Tausendschon). A mass of bright, delicate flowers in varying shades from a flushed white to a rosy carmine tint, all in one plant. A vigorous hardy climber with almost no thorns. First size, 1-yr. plants, 30c each; 2-yr., 65c, postpaid.

Why Raise Roses for the Bugs to Eat? Use Hall's Tobacco Dust. 2-lb. box, 60c.

Among all of the flowering shrubs there is none more beautiful than the Rose. Roses require a great deal of sunlight and should always be planted with this in mind. Roses will thrive and do well in any fertile soil and will show added improvement if soaked occasionally with a weak manure water during the blooming season.

Everblooming Hybrid Tea Roses

EDWARD MAWLEY. Velvet crimson of a deep, rich color on huge petals beautifully arranged to form faultless blooms of wonderful depth and sweetly perfumed. An ideal, free and perpetual flowering garden Rose. First size, 1-yr. plants, 45c each; 2-yr., \$1.10, postpaid.

HELEN GOULD. An incessant grower and bloomer. Long, beautiful buds and full, double flowers of warm, rosy crimson, resembling a red ripe watermelon. First size, 1-yr. plants, 35c each; 2-yr., 75c, postpaid.

MME. CAROLINE TESTOUT. Brilliant satiny rose, deepening at center and bordered with silvery rose; immense broad petals and extremely large flowers. An exceptionally free bloomer. First size, 1-yr. plants, 45c each; 2-yr., \$1.10, postpaid.

OPHELIA. Brilliant salmon flesh shaded with rose on outer edge of petals, with a great heart of glowing peach pink and orange, yellow blendings, all passing finally to lighter shades; fragrant as Richmond, faultless in form of bud and flower; immune to mildew and black rot. First size, 1-yr. plants, 45c each; 2-yr., \$1.10, postpaid.

RADIANCE. Brilliant rosy carmine, shaded with rich opaline pink tints in the open flower, which is large, full, of fine form, with cupped petals. A constant and fragrant forcer, producing strong, upright canes and an excellent keeper in Summer. First size, 1-yr. plants, 40c each; 2-yr., \$1.00, postpaid.

SUNBURST. Orange-copper or golden orange and golden yellow, all intense shades, giving an extremely brilliant effect. A giant Rose, long stems, long, pointed buds, vigorous, free and healthy, and splendid keeping qualities as a forcer. First size, 1-yr. plants, 50c each; 2-yr., \$1.20, postpaid.

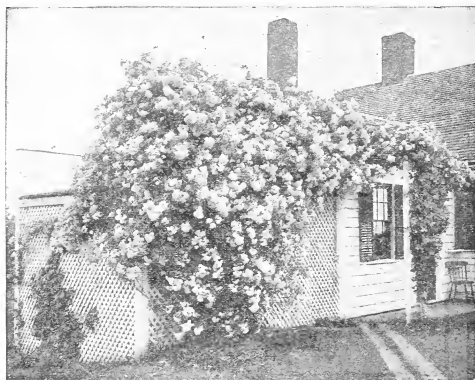

WHITE KILLARNEY. A pure white sport from the pink parent, the newest thing in a forcing Rose. A true Waban strain and very popular. First size, 1-yr. plants, 30c each; 2-yr., 65c, postpaid.

Hybrid Perpetual or June Roses

AMERICAN BEAUTY. One of the finest Roses grown. Rich glowing crimson, very delicately veined and shaded; of a most exquisite fragrance. First size, 1-yr. plants, 40c each; 2-yr., 85c, postpaid.

DINSMORE. A general favorite on account of its vigor of growth, constant and prolific bloom, which begins early and continues all through the season. Flowers large, perfectly double; rich crimson-scarlet. First size, 1-yr. plants, 30c each; 2-yr., 65c, postpaid.

GENERAL JACQUEMINOT. The premier hardy crimson Rose. Buds and flowers are considered models of perfection and its brilliant shining color is the standard by which other Roses are judged. First size, 1-yr. plants, 30c each; 2-yr., 65c, postpaid.

Crimson Rambler Rose.

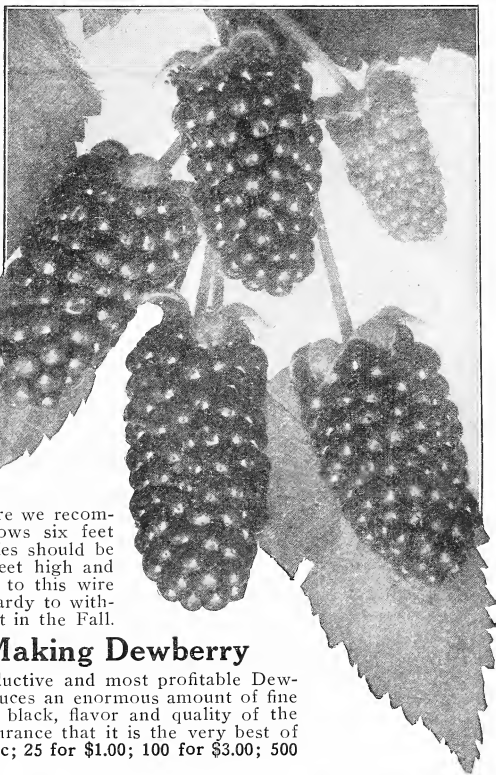

Grow Dewberries For Profit

Considering the enormous yields and big profits realized by growers of Dewberries it is surprising that they are not more generally and extensively grown. Many growers in this county have planted large fields of Dewberries during the past few seasons and are now reaping big profits. This is because Dewberries ripen two weeks earlier than blackberries. They are on the market when fruit is scarce and consequently command big prices. Dewberries are twice as productive as blackberries, the fruit is larger, sweeter, quality of the best, making them equally desirable for home use or market. Dewberries are free from rust and other fungous diseases and a field of them will produce big paying crops for years.

CULTURAL DIRECTIONS. For field culture we recommend planting Dewberries five feet apart in rows six feet apart. For ease in gathering the fruit Dewberries should be trellised. This is done by setting posts three feet high and using one wire. The new canes should be tied to this wire in the Spring. Dewberries are not sufficiently hardy to withstand northern Winters; cover with straw or dirt in the Fall.

Lucretia, The Big Money-Making Dewberry

We recommend the Lucretia as the most productive and most profitable Dewberry. It is a strong, vigorous grower, and produces an enormous amount of fine fruit regularly. The berries are large, long, jet black, flavor and quality of the very best. You can plant Lucretia with full assurance that it is the very best of the Dewberry family. Postpaid Prices: 10 for 50¢; 25 for \$1.00; 100 for \$3.00; 500 for \$13.50; 1000 for \$22.50.

Lucretia Dewberries.

Eldorado Blackberries.

Eldorado Blackberry

The Hardy Berry That Withstands the Most Severe Cold Weather

Eldorado is without exception the most profitable Blackberry under cultivation. It is perfectly hardy and never has been known to Winter-kill. The canes are stocky, free from disease and extremely productive of large, jet black berries. Flavor excellent, making it very desirable for home use. Eldorado is a fine commercial variety as it is a fine looking berry and holds its color well. Whether berries are wanted for home use or market you will make no mistake in planting Eldorado.

Each plant in our fine lot of root-cutting blackberry plants has a well-developed root system of its own. You are certain to get a liberal picking from them the first season after planting. The culture of Blackberries is a very simple matter. It is important that they be placed in the ground, at just the depth at which they were grown, preferably in light soil. Trim to a height of two or three feet the following season. It is well to pick out the centers of the plants while they are growing to increase the number of branches. The root-cutting Blackberry will cost a little more than the ordinary Blackberry, but will more than repay you for the added expense. We have a limited supply of these plants, so advise you to place your orders early. Postpaid Prices: 10 for 75¢; 25 for \$1.75; 100 for \$6.00; 500 for \$27.50; 1000 for \$50.00.

Our Specialties of Unusual Merit

Palmetto Asparagus.

PALMETTO ASPARAGUS PLANTS. Save one or two years by planting the roots. 12 for 35c; 50 for \$1.00; 100 for \$1.75, postpaid. Two year plants 1c each additional, postpaid.

Palmetto Asparagus

Asparagus is becoming a main crop with a great many farmers, and it is important that only first-class plants of the best variety be used in order to gain the best results.

Asparagus will produce well in practically all sections of the country, and it should be in every garden. It is the most popular of all the early vegetables, coming as it does so very early in the Spring before other vegetables are ready. By getting first-class plants it is easy to get a bed started, and it will last nearly a lifetime.

To plant Asparagus: Dig trench ten inches deep and ten inches wide. Cover bottom with stable manure; cover manure with thin layer of soil. Place your plants two feet apart, spread out roots and cover the plants with good soil. Do not fill up trench right away. As the sprouts come through, fill up gradually until they have grown to the top of trench. For best results, do not cut until after second year.

You Make from \$400 to \$600 per Acre Growing Asparagus

PALMETTO. The most popular early green variety. Prolific, very tender and rich, splendid quality. No home garden complete without a bed of Asparagus to supply the table with the choicest vegetable of early Spring. Pkt., 5c; oz., 10c; ¼ lb., 30c, postpaid.

New Golden Evergreen Sweet Corn

Sweet Corn is pre-eminently a home garden crop. Scientists have proven that within half an hour after an ear of corn is picked its sugar begins to turn to starch, and so the delicious flavor which growers of New Golden Evergreen know is possible only for those who eat corn within 30 minutes of its picking. Never sow less than four rows of corn. If space is limited sow four short rows. Otherwise the precious pollen, which fertilizes each silk to make a kernel will be lost and imperfect ears will result.

This new variety is the result of a cross between Evergreen and Golden Bantam. The ears are 6 to 8 inches long, well filled with deep kernels of rich yellow color. Has true Evergreen habit, remaining equally as long a time in good cooking condition. Has all the delicious quality of the Golden Bantam, with an added sweetness and superior flavor. For the home garden and fancy market trade this corn has no equal. Plant both Golden Evergreen and Bantam and have a supply of the very best Sweet Corn during the entire season. Pkt., 10c; ¼ lb., 20c; lb., 50c.

Earliest and Best Tomato.

The bugs will be dead when you come back, if you use **HALL'S TOBACCO DUST.** 2-lb., box, 60c.

The Perfect Tomato

New Golden Evergreen Sweet Corn.

Earliest and Best Tomato

The earliest and best Tomato grown. The "wonder Tomato"—earlier than "Earliana" and better than "Stone," and the best shipper ever grown. Most perfect fruit of all. No scalds, blight or cripples. Produces enormous crop of beautiful, solid, meaty, smooth, unscarred, even, and almost seedless fruit of very finest flavor.

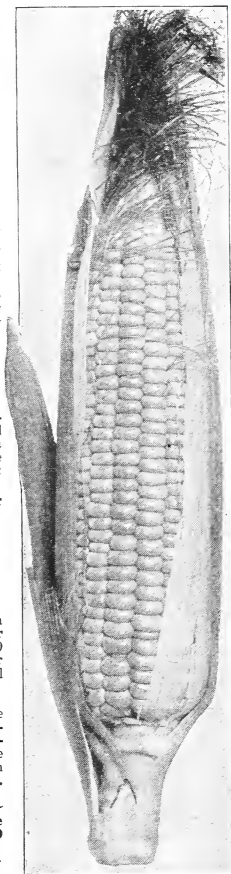

Not only is it the most beautiful Tomato you ever saw, but it also has the finest flavor you ever tasted.

It is almost seedless. A marvelous stem setter; often ten fruits in first cluster, and all solid and meaty.

It has just enough foliage—will stand plenty of manuring without going to vine.

It is the most perfect shipping Tomato ever grown.

It is such a tremendous yielder and fruits are so clustered that it can be gathered in about half the time required for other varieties. Peelers can handle three bushels of this Tomato to one of any other. We recommend the "Earliest and Best." Try it. You will make no mistake. Pkt., 10c; oz., 50c; ¼ lb., \$1.50.

Winter Rhubarb

\$100 to \$200 Worth Can Be Grown in an Ordinary Cellar During the Coldest Winter Weather

You can have Rhubarb any time in the Winter and market same at high prices. The profit in growing Rhubarb is enormous, and the culture for open field, or as a forcing crop for Winter is very simple. Plant a quantity of our Early Giant Rhubarb roots this Spring; cultivate well to secure large clumps of roots by Fall. In the late Fall take these clumps up and allow them to freeze for a few days and nights; then set them in barrels or boxes and put them in a cellar or any place where the temperature can be kept from 50 to 70 degrees. Keep the soil moist—not wet—and in 4 or 5 weeks you will have Rhubarb large enough to use or sell on the market. You can get about three cuttings during the Winter, when prices are high and from \$100.00 to \$200.00 worth can be grown in an ordinary cellar during the Winter.

Early Giant Rhubarb is also especially adapted for forcing in greenhouses, hotbeds and cold frames. If grown in the open field it is the first vegetable from the ground in the Spring and the easiest of all perennial plants to grow. A half dozen plants will supply a large family during the season, and plants well established will last for years. There always is a big demand and as a money maker with very little work and expense, we recommend Rhubarb.

We offer a fine stock of roots this Spring, every one of which should make a good clump for either Winter forcing or ordinary field culture.

Prices: 35c each; 3 for 90c; 12 for \$3.00, postpaid. By express, not prepaid, \$9.00 per 100; \$20.00 per 250; \$35.00 per 500; \$65.00 per 1,000.

We always recommend the planting of Rhubarb roots instead of seed, but if seed is wanted, we can supply same at 10c per packet; 30c per oz.; 90c per ¼ lb.; or \$3.00 per lb., postpaid.

Jumbo Pumpkin

The Largest Pumpkin Grown

Here is the big Pumpkin. Often weighs 100 to 300 lbs. Always a prize winner at exhibitions. Although large it is of good quality, a good pie Pumpkin, a splendid keeper, and valuable for feeding purposes. Boys, you should grow this one. Pkt., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.75.

Jumbo Pumpkin.

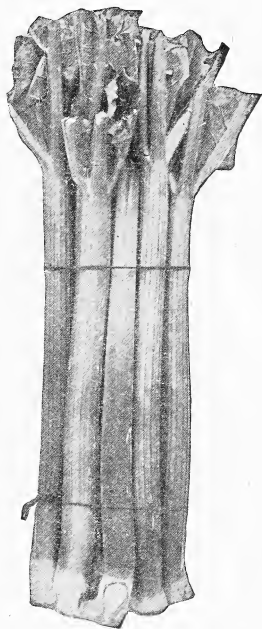

Kohl Rabi

(Turnip Rooted Cabbage)

CULTURE. A peculiar vegetable belonging to the cabbage family and forming a turnip-shaped bulb above the ground, which is used in the same manner as turnips. Cultivate the same as cabbage; should be used when young and tender. One packet to 400 feet of row; 4 pounds per acre.

EARLY WHITE VIENNA is a very select, extra early strain. The flavor of the young roots when they are 2 to 3 inches in diameter is distinctly sweet. The flesh is firm but cooks very tender, retaining a desirable amount of crispness. This variety is considered the finest of all, resembling cauliflower in flavor. For a continuous supply sow every 2 weeks up to the middle of July; may be grown between the rows of late cabbage. Pkt., 10c; oz., 20c; ¼ lb., 60c, postpaid.

If you want larger crops, use WIZARD Sheep Manure. 50 lbs., \$1.50; 100 lbs., \$2.50, not prepaid.

Early Giant Rhubarb.

Japanese Radish

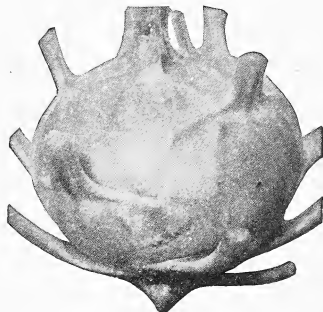

"Nerima Long"

An introduction from Japan. The roots grow to enormous length, often growing three feet long. The white flesh is crisp, tender and sweet. Can be eaten like other radishes or cooked like turnips, or pickled. One of the leading vegetables in Japan. You will want to try it. Pkt., 10c; oz., 35c.

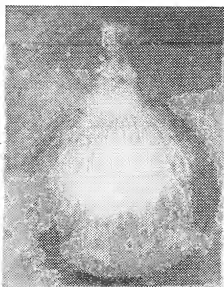

Okra

CULTURE. Very easy to grow; a plant that insects and pests do not bother much. Okra is a very profitable market crop, always being in good demand, bringing good returns for the time and money invested. So if you are looking for a good money truck crop, we urge you to plant an acre or two of Okra and you will be surprised at the returns. One ounce of seed will sow 50 feet of drill; six pounds to the acre.

A fashionable southern vegetable. Served like asparagus when stewed, or in soup. Also pickled. Why not try them. Pkt., 5c; oz., 10c; ¼ lb., 20c, postpaid.

Early White Vienna Kohl Rabi.

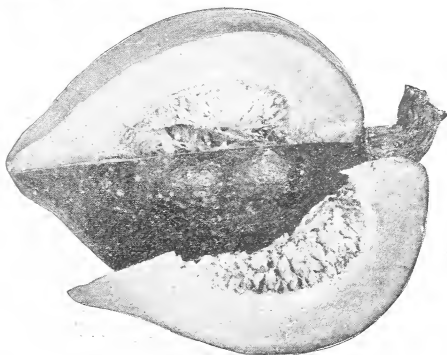

Prizetaker Onion.

Chinese Giant Peppers.

Dry Weather Cauliflower.

Delicious Squash.

Chinese Giant Pepper.

CULTURE. Plant seed $\frac{1}{2}$ inch deep in early Spring or in boxes in the house; when all danger of frost is over, transplant out in the garden in rows 2 to 3 feet apart and 18 inches apart in the rows.

Thousands of market gardeners plant this wonderful Pepper because of its ready sale. Besides being the largest Sweet Pepper grown it is popular for its magnificent appearance and wonderful flavor. The flesh is very tender and thick and it is without a doubt the best for home use as it slices fine and is so mild that it may be eaten raw like tomatoes. They grow to 4 and 5 inches in length and are as thick through and the well-branched plants are loaded with fruits. It ripens a little later than some of the medium and small sorts. Pkt., 10c; oz., 50c; $\frac{1}{4}$ lb., \$1.50, postpaid.

Model Golden Salad Cucumber

The flesh of this new variety of Cucumber is a rich golden yellow and is unexcelled for use as a salad. It is a strong grower and very prolific and will be a welcome addition to every garden. We have but a limited supply of seed which we offer while it lasts at, pkt., 10c; 3 pkts., 25c, postpaid.

Model Long Form Tomato

The greatest novelty ever offered. A Tomato that grows from 4 to 5 inches long and about 2 to 2 $\frac{1}{2}$ inches thick. The color is a bright scarlet when the fruit is ripe and a plant full of fruit presents a wonderful appearance. It is early and very prolific, sometimes yielding as many as twenty fruits in a bunch. Superior quality and solid fleshed and will keep for a month or two after ripening. A variety that's different and of unusual merit. Be sure to include at least a packet in your order. Pkt., 20c; 3 pkts., 50c, postpaid.

Drought Proof Bush Lima Bean

A distinct new variety which is drought resistant and hardy. It is not easily injured by frost and is well adapted to long periods of hot, dry weather. It is very prolific and easy to grow. It can be grown successfully in any part of the United States and is especially desirable where long, hot summers are common. It ripens early and the pods are large and well filled. It is worth while and deserves a place in every garden. Be sure it is in yours. Pkt., 15c, postpaid.

Prizetaker or Mammoth Spanish Onion

The largest, most productive, mild flavored, yellow, Spanish Onion for market and home garden in the world. The kind you see at all good fruit stands and so sweet and mild flavored that it fairly melts in your mouth and may be eaten like an apple. It is a fine shipper and the size is very uniform. Our seed is an extra select strain and you can easily grow these large, mild, sweet, juicy Onions if you plant the seed early. Pkt., 10c; oz., 50c; $\frac{1}{4}$ lb., \$1.75, postpaid. Prices on pound lots sent on request.

Dry Weather Cauliflower

This is the variety of Cauliflower that you have always been looking for. It will grow anywhere and is especially adapted to hot, dry districts where it is difficult to grow other varieties. It does equally well either early or late and if the weather is not right it will wait until it is. You cannot fail with dry weather Cauliflower, it won't let you. Plant in the open during the Fall months or in hotbeds in the early Spring; transplant to the open when plants are 4 or 5 inches high. Pkt., 15c; oz., \$2.25, postpaid.

Delicious Squash

The Finest Squash Grown.

No other Squash can compare with the Delicious for home garden use and it also is becoming a leading market variety. Its sweetness and richness of flavor distinguish it from all other varieties and for pies it has no equal. Excellent for Fall and Winter use and will keep until late in the Spring. The rind is a very dark green with mottled effect of gray-green spots, while the flesh is a rich orange-yellow of very fine grain. Grows 6 to 10 pounds. We do not hesitate to call it the finest and best Squash grown. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c, postpaid.

Feed Your Plants. Keep lawns fresh and green. Use STIM-U-PLANT. 30 tablets, 25c; 100 tablets, 75c.

New Zealand Spinach

Spinach is greatly appreciated by those who like greens and more of it should be eaten. It is served by all first-class hotels and dining cars and is to be found on every well-planned menu. Do you eat Spinach? The New Zealand Spinach is a distinct variety, especially adapted to hot weather, and will do well in arid or dry regions. Bears heavily all Summer, forming large spreading plants which often cover as much as five feet of space. The tips of the branches are always brittle, tender and appetizing and make one of the health dishes of the nation. Pkt., 10c; oz., 20c; ¼ lb., 40c, postpaid.

White Icicle Radish

This Radish contains some of the precious vitamin B, which is so necessary to health and you can easily grow them in your garden. Light sandy soil which has been moderately fertilized is the best and if you have trouble growing them because of worms a little common salt sprinkled in the row at the time of planting will allow you to grow smooth, crisp Radishes without a blemish. The White Icicle Radish is the finest and best of the early long white Radishes and grows rapidly. It is a popular variety for the early market and is considered by many to be the finest Radish grown, and resembles nothing so much as the icicle after which it is named, in form. Ready in 25 to 30 days after planting. Pkt., 5c; oz., 10c; ¼ lb., 30c, postpaid.

Mammoth Sandwich Island Salsify or Vegetable Oyster

A wholesome nutritious vegetable, which, when cooking, one cannot tell from real oysters. The soup smells the same, looks the same and tastes the same and is the same all except the oyster. In common with the oyster it may be breaded or boiled and fried in butter or for soup and is delicious either way. May be left in the ground over Winter like parsnips and used in the early Spring when fresh vegetables are hard to obtain. Roots are long and smooth, white in color and excellent in quality. Pkt., 10c; oz., 30c; ¼ lb., 90c, postpaid.

Glory of Enkhuizen Cabbage

The Wonder Cabbage

A new Cabbage of great merit, resembling the Danish Ballhead in appearance. It is without a doubt the finest early Cabbage grown. It makes a solid head that is tender and of excellent flavor and weighs about 8 pounds trimmed. A fine keeper and a sure header. It has been said there is a Cabbage in every seed and we consider it the best Cabbage we have ever offered. It is rich in vitamins B and C and has a goodly supply of the vitamin A. Eat more Cabbage and eat for health. This variety is destined to become the leader of the market garden sorts as the heads are always solid, the first thing a Cabbage buyer looks for, and they are just the right size. We invite market garden and commercial growers to write for prices. Pkt., 10c.

Celeriac or Turnip Rooted Celery

This popular European vegetable deserves a much wider cultivation and should be in every garden. Used in salads, soups, stews or boiled like parsnips it makes a delicious dish. Sow the seed as soon as the ground is in good workable condition in the Spring and when the plants are about three inches high transplant them to set six inches in the row. Only the roots are used, and when they are about two inches in diameter they are ready to serve. They can be kept in excellent condition for Winter use by packing them in damp sand in the cellar. One you have planted this wonderful vegetable you will never be without it in your garden. Pkt., 10c; oz., 20c; ¼ lb., 60c, postpaid.

Hybridized Potato Seed

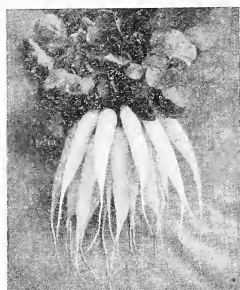

Grow New Varieties of Potatoes from the Seed Balls

Some of them are sure to be valuable and may net a fortune to the grower. Many choice varieties have been originated by amateurs from potato seed. They have an equal chance with the potato specialist, for Nature does the work. Fame and fortune await the originator of varieties that are distinct and better in certain respects than those now on the market. Further, the growing of potatoes from seed is very interesting work. We have seen reports from some growers who state that they have raised over 100 different kinds of potatoes from one packet of seed. Full planting directions on every packet. Pkt., 15c; 2 pkts., 25c; 5 or more packets, 10c each, postpaid.

For better growth and bigger crops, use WIZARD Sheep Manure. 50 lbs., \$1.50; 100 lbs., \$2.50.

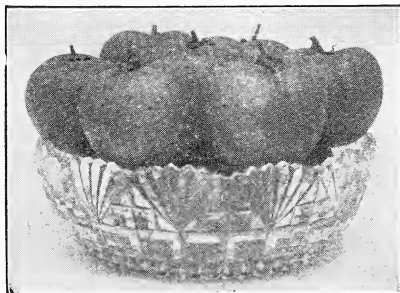

New Zealand Spinach.

White Icicle Radishes.

Glory of Enkhuizen Cabbage.

Chinese Prolific Bean

This wonderful Bean is the only rival of the famous Yard Long Bean. The plants are of erect growth, forming tall, each plant being literally covered with pods about 30 inches long. Used as a Snap Bean it is delicious when cooked and can be boiled or used for soup when ripe. It is a distinct variety and is sure to become the most popular of all. Be the first to introduce it into your neighborhood. Pkt., 10c; 2 pkts., 25c, postpaid.

Cos or Celery Lettuce

This is an entirely distinct type of Lettuce that is very popular in Europe, and is rapidly coming into favor in this country. The plants are of erect growth, forming tall, slightly oblong bunches of crisp leaves. Mild in flavor, crisp and tender and of best quality even when grown during the hot Summer months. The outside leaves should be loosely gathered and tied at the top several days before using as this will blanch the inner leaves to almost pure white and gives them a delicious crispness. Favorite for salad. Pkt., 10c; oz., 25c; ¼ lb., 70c, postpaid.

Snake Cucumber

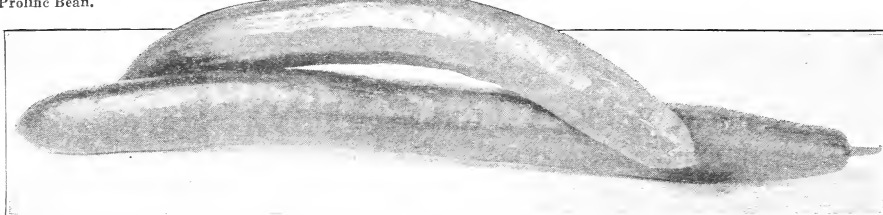

Like its name, this curious Cucumber resembles nothing so much as a long green snake. It grows three feet long and more and is a distinct, novel variety. Plant a few of them and take home the prize from your County Fair this year. Seed should be planted early to obtain best results. Pkt., 10c; 3 pkts., 25c, postpaid.

Cos Lettuce.

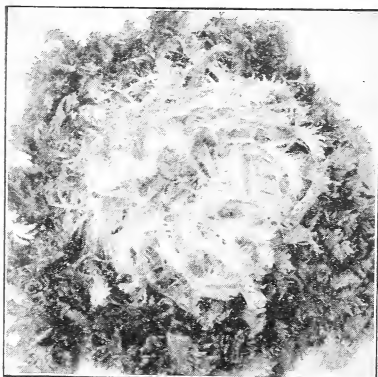

Chinese Prolific Bean.

Snake Cucumber.

Self-Blanching Endive

One of the best salads for Fall and Winter use; also desirable for greens and as a flavoring for soups and stews. For early Spring crop sow as early as the ground can be well worked, and in drills 1½ feet apart. When the plants are 3 inches high transplant to one foot apart in the rows. For Fall and Winter use sow seed from June to August and plants will be ready in about 70 days. Endive contains some of the precious vitamins A. and C. and more of them should be eaten. Pkt., 10c; oz., 20c; ¼ lb., 60c, postpaid.

Self Blanching Endive.

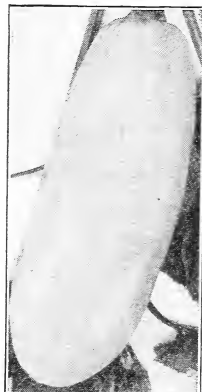

Cocozelle or Italian Vegetable Marrow

This wonderful new vegetable belongs to the squash family but it is so different that you will marvel at it. The flesh is very tender, and it has a delightful piquant flavor all its own. It is easy to grow and should be in every garden because of its real merit. This plant does not make a vine, but grows in bush form and it is so prolific that 5 or 6 hills will supply a large family and take up a minimum of garden space. The oblong green fruits should be picked when not more than 4 to 6 inches long as they lose their delicate flavor when they grow larger. Pkt., 10c; oz., 20c; ¼ lb., 60c, postpaid.

Directions for Cooking Cocozelle

An Italian chef in one of the largest and most fashionable restaurants in the country, furnishes the following recipes for preparing Cocozelle: **FLORENTINE**—Raw, cut in dice, about ¼ inch. Season with salt and pepper. Dip in flour and then raw egg. Fry in skillet with olive oil and serve with drawn butter. **MORNAY**—Cut in small squares about one inch. Boil for about one minute in salted water. Drain in a colander. Put in baking dish, cover with cream sauce and a little Parmesan cheese and butter, and bake in oven until done. **JULIENNE**—Cut in Julienne like French fried potatoes; dip in milk, and then flour. Fry in a very hot grease. Season and serve. Can also be cooked like Asparagus or Squash.

The bugs will be dead when you come back, if you use HALL'S TOBACCO DUST. 2-lb. box, 60c.

Cocozelle.

Give the DASHEEN a Trial

We call the Dasheen a new vegetable because it is new in this country, but in fact it has been grown for years in China, and is known in various parts of Europe, Asia and South America.

The Dasheen is grown principally as a root crop, the tubers being used the same as Irish Potatoes. The tubers sometimes reach a weight of more than 6 pounds each. One hill will produce on good rich soil 6 to 8 pounds or more of tubers, and in rare instances 20 to 26 pounds of Dasheens have been taken from a single hill. Crops of 600 to 900 bushels per acre have been produced.

From the interest that has already developed among southern farmers who have become even slightly acquainted with the Dasheen, it surely looks as though this crop is destined to be of great importance to that section of the country. It can be grown as a Summer crop in a region where the potato must be grown almost entirely as a Spring crop, for it ripens its tubers in the early Fall and furnishes them for the table at a season when northern grown potatoes have to be shipped in.

PRICE OF SELECTED SEED TUBERS: 3 for 40c; 6 for 75c; 12 for \$1.25; 25 for \$2.00; 50 for \$3.75; 100 for \$7.00, delivered to you prepaid. Pamphlet giving cultural directions and recipes for preparing and cooking the Dasheens, free with each order.

Dasheen.

Kudzu, the Remarkable Soil Improving Forage Crop

Kudzu is a native of Japan, where it is a leading hay crop, and is highly recommended by the United States Department of Agriculture.

Growers are now propagating it almost entirely by transplanting young plants from old Kudzu fields, owing to the fact that the seed is very scarce and does not germinate readily in the open ground. They prepare the ground the same as for a crop of corn, and then check off into rows 5 to 10 feet each way, setting a plant at each check. If set 10 feet apart each way it only takes about 450 plants to set an acre, so you see it is not as big a job as one might imagine, and the time spent is a very small consideration when you figure that once you get it planted it is there to stay as long as you want it.

**A Wonderful Perennial Legume.
More Nutritious than Alfalfa.**

Yields Heavier than Fodder Corn.

Improves the Soil More than Clover.

Cures Quicker than Timothy.

Permanent, but Easily Eradicated.

**Grown Successfully in all Parts of
the United States.**

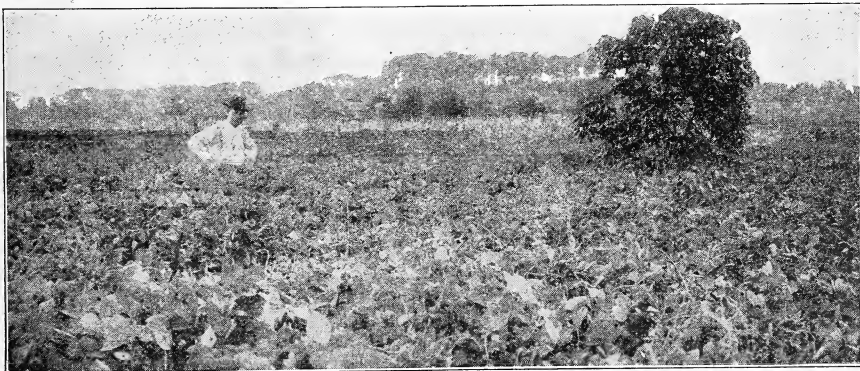

We have a limited supply of both seed and plants to offer this season, and it would pay each of our customers to get started with this wonderful forage crop. By planting a few dollars' worth of seed or plants you would soon be able to grow enough young plants to set out a good acreage. All Kudzu seed sold by us is put up in sealed packages and guaranteed to be the best that can be bought.

Per package, 25c; 5 packages, \$1.00; 12 packages, \$2.00; 20 packages, \$3.00; 35 packages, \$5.00, postpaid.

PRICE OF KUDZU PLANTS

12 for \$1.50; 25 for \$2.75; 50 for \$5.00; 100 for \$9.00.

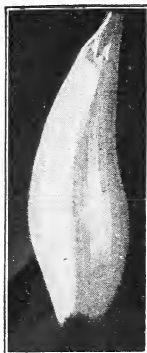

Plants delivered prepaid to any part of the United States at these prices, and all plants guaranteed to be healthy, hardy, self-inoculated field-grown roots.

Kudzu as a Forage Crop.

Model Ox Horn Onion

This is without a doubt the greatest novelty ever offered. Grows to six inches in length and about an inch in diameter. Used as a green Onion for the table it has no equal and the flavor is unsurpassed. Can be grown to maturity and stored as other Onions for Winter use. **Pkt., 10c; 3 pkts., 25c, postpaid.** Write for prices on pound lots.

Ox Horn Onion.

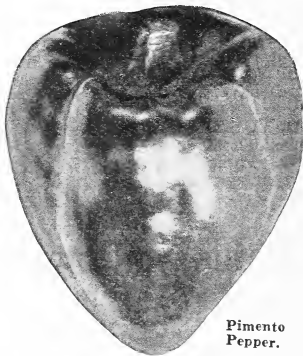

Pear Form Onion.

Pear Form Onion

Distinct shape, sometimes called the Bottle Form Onion, 6 inches long by 4 inches thick and of straw color. The mildest and best flavored Onion grown, very early and productive and can be easily grown anywhere. Be sure to include at least a packet of this wonderful new Onion in your order. **Pkt., 10c; 3 pkts., 25c, postpaid.**

Model Pimento Pepper

The great thick meated canning Pepper. Excellent for the home garden. It is as sweet as sugar and very early. It is noted for its fine flavor and is an unequalled sandwich filler. If you grow it once you will never be without it in your garden again. Be sure to include at least a packet in your order. **Pkt., 10c; 3 pkts., 25c, postpaid.**

Pimento Pepper.

Corn Salad

This is a hardy Winter Salad, the small leaves being served like lettuce during the cool Fall and early Winter months. It is used also for garnishing meat dishes in the same manner as parsley and cress. It does not succeed in warm weather and seed should be sown in September, to supply fresh leaves during the Fall and Winter months. It is quite hardy and may be protected with a thin mulch of soft straw or hay after cool weather sets in. **Pkt., 10c; 3 pkts., 25c, postpaid.**

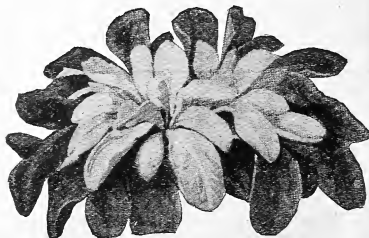

Long Titanic Asparagus Bean

Asparagus Beans are a species of the Vigna genera, botanically known as Vigna Sesquipedalis and while little known in this country they have been cultivated in the Orient for centuries. A meritorious garden vegetable, forage plant and soil renovator, being a legume it draws nitrogen from the air and adds this valuable fertilizer to the soil. The pods are 30 inches long, tender, stringless and palatable as a snap Bean or they may be shelled and cooked by boiling, baking or used for soup. For garden culture the vines should be given support, but can be grown without it. Very drought resistant. **Pkt., 15c; 2 pkts., 25c; 5 pkts., 50c, postpaid.**

Asparagus Bean. postpaid.

Feed Your Plants. Keep lawns fresh and green. Use STIM-UP-PLANT. 30 tablets, 25c; 100 tablets, 75c.

Corn Salad.

THERE ARE BIG PROFITS IN GROWING GRAPES

The White Concord (Niagara) is the finest wine grape grown and always commands the highest market price. We have an exceptionally fine stand of this famous White Grape grown right in the heart of the Michigan Grape Belt and from the world's finest vineyards. The White Concord will grow in almost any garden, and is especially adapted to light, sandy soil. Plant a vineyard of this wonderful White Grape and get started on the road to success. **Write for special prices on lots of 500 or more.**

See page 32 for description and prices.

Try These Three Hardy Chinese Fruits

There are three hardy, vigorous fruit trees that can be easily grown from seed. Natives of Northern China, they are insured to cold weather, and can be grown and fruited anywhere in the United States. The fruits are good, and have been in common use in North China for generations. Grow a few in your garden.

Chinese Date

Chinese Date.

almost black, when fully ripe. The "dates," while sweet, when fully ripe have a full flavor, preferred by many to the insipid sweetness of the tropical or true date.

The Chinese Date is becoming a favorite in this country, wherever it has been planted. The fruit makes a welcome addition to our standard fruits, and is being more generally planted every season.

A packet contains seed sufficient to produce from six to ten trees. The seed may be planted in a row in the garden, with some vegetable seed in the same row to mark it, as the Date seed sometimes takes a month or more to germinate.

In addition to the valuable fruit, the Chinese Date is without a peer as an ornament. Its beautiful clusters of golden yellow flowers vie with most of the ornamental shrubs in loveliness. Be sure to include the Chinese Date in your order.

PACKET 20 CENTS, POSTPAID
3 for 50 cents 7 for \$1.00

Manchu Cherry-Plum

Grows to a dwarf bush-like tree that fruits the second year and each year after, bearing a small, deliciously flavored Plum about the size of a cherry.

It succeeds in all parts of the United States, and is especially valuable for planting in the Dakotas, where it withstands the very severest Winters.

Seed planted in the Spring germinates in three to five weeks, after which the growth of the tree is rapid. The first blossoms appear the second year, and some fruit usually sets. After the second year the tree is literally covered with dark red cherry-plums, very similar to the Damson in flavor, though perfectly round in shape.

"Manchu Cherry-Plum."

The fruit is equally valuable for eating from the hand, and for cooking, for preserves, pies, etc. Prof. L. H. Bailey says of this fruit: "It is hardy even in the Dakotas, and improved fruit-bearing trees of importance are likely to arise."

Plant a row of these hardy Chinese "Manchu" Cherry-Plums in your garden, and be the first in your locality to have this delicious fruit from your own trees.

PACKET 20 CENTS, POSTPAID
3 for 50 cents 7 for \$1.00

"Yogi" Persimmon

One of the most valuable of the Oriental trees, not only as a source of a rare variety of delicious and wholesome food, but the tree itself, which rapidly grows to an immense height, is one of the most valuable woods for the manufacture of fancy articles and high grade furniture.

The tree is easily grown from seed, planted in the Spring. The tree fruits after the second year, being literally covered with shiny black fruits. The flavor of the Yogi Persimmon is unsurpassed. It is valuable for canning, and makes the finest kind of preserves and jam.

In China and Japan the juice is extracted and made into a beverage that is very popular. The fruits may also be used for sweet pickles.

A few of these trees will supply you with a large crop of choice fruit every year. The fruit finds ready sale everywhere, as a well-defined, active demand exists for Persimmons, and the "Yogi" is well up in the front rank in point of quality.

Our "FROST-PROOF" Plants

Frost-Proof Cabbage Plants

Are grown for us in the South along the sea-coast where the soil and climatic conditions produce tough, hardy plants during the Winter and early Spring. These plants will stand a temperature of 15 degrees above zero without injury, even if they are covered with ice, sleet or snow. They can be planted a month or six weeks ahead of home grown plants and will mature two to four weeks earlier. We can supply the following varieties only: Early Flat Dutch, Charleston Wakefield and Early Jersey Wakefield and we can only supply plants from December 1st to May 1st.

White Bermuda Onion Plants Frost-Proof

Can be planted any time after November and on through to May. Frost and light freezes actually help to make a fine, firm onion. All plants are guaranteed to give satisfaction, for every onion plant makes a good onion. Be sure to order a few of these plants. Complete instructions on "How to Grow Bermuda Onions from Plants" are sent with every order. All plants are packed in bunches of 100.

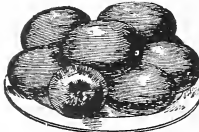

PRICES of Both Onion and Cabbage Plants: 100 for 75c; 500 for \$2.50; 1,000 for \$3.75; per case of 6,000 plants, \$15.00.

TRY THESE SEED NOVELTIES

Vine Peach

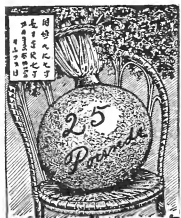

Ripe Fruit in 80 Days After Seed Is Planted.

This wonderful Vegetable Peach is the most beautiful of all vegetables. They resemble oranges in color, shape and size, and grow on

vines like melons. They present a beautiful and tempting appearance when canned; make delicious preserves and sweet pickles; and are fine for pies. There is nothing like them. Extremely early, of the easiest culture and very prolific, covering the ground with golden fruit. They grow from the seed in 80 days. A package of the seed will be sent postpaid for 10c; 3 packages for 25c.

Japanese Giant Radish

This is the great Sakurijima Radish from Japan. The largest Radish grown, often attaining the enormous weight of 15 pounds, and sometimes 20 or 30 pounds.

It is a real "novelty" to most Americans, and the taste will immediately

convince anyone of the fact that it is not merely a curiosity but a Radish of extraordinary quality. The flesh is solid, firm and brittle, and of most excellent flavor. It will grow and thrive in any soil or climate.

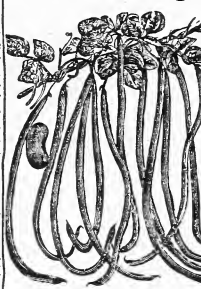

This is a Radish that can be planted in the Spring and eaten all Summer long, and can also be kept through the Winter if dug in the late Fall and buried in a box of dry sand in the cellar. As a Summer Radish it is a wonder, as it will grow and thrive when it is so hot and dry that common Radishes would be a failure. By all means try the Sakurijima Radish and you will be surprised at the real value of this monstrous variety. Send for package of the seed today, before it is all gone. Pkt., 10c; 3 packets, 25c, by mail, postpaid.

Lima Peas

This is the most wonderful Pea in the world. The Peas are as large as the largest Lima Bean, and nearly the same shape. This pea is very hardy and can be planted as soon as the ground thaws out in the Spring. We plant them here a month ahead of any other garden. In growth it is unlike other varieties of Peas, for instead of being a vine, it is a bush of upright growth, about 2 feet high, with strong, sturdy stalks. It is wonderfully productive. Botanically it belongs to the horse bean family and has been advertised to some extent as a Giant Butter Bean, but in reality it is more like a pea than a bean. The Lima Pea is a most delicious vegetable, and sure to become as popular as the Lima Bean. We have but a limited amount of the seed, so we are selling it in packets only. Pkt., 10c; 3 pkts., 25c; 7 pkts., 50c; 15 pkts., \$1.00, postpaid.

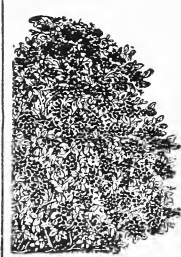

Yard Long Bean

This is an excellent variety, as well as being an interesting curiosity. The vines are rampant growers and produce an enormous crop of long, slender, round pods, which are of excellent quality for snap beans. The round pods average from 2 to 4 feet in length, having the thickness

of a lead pencil. Produce late in the Summer, very productive, tender and of fine flavor. Pkt., 10c; 3 pkts., 25c, postpaid.

Garden Huckleberry

The New Garden Huckleberry grows from seed the first year. A new fruit that cannot be excelled for pies and preserves. It is very prolific, yielding an immense crop of fruit. It is an annual and must be planted each year from seed. Grows and thrives in all climates and on all kinds of soil.

The fruits grow larger than the common Huckleberry or Blueberry. If cooked with apples, lemon or anything sour, they make the very finest jelly. You will be delighted and astonished with this easily grown and wonderful novelty. Send your order today. Pkt. of seed, 10c; 3 for 25c, postpaid.

Japanese Climbing

Cucumber

A distinct new Cucumber from Japan. The vines are extra strong and vigorous, and great climbers, producing a surprising amount of superior fruit on poles, fences, side of house, etc. Three times the usual crop from a given area can be grown with this variety. They are large size, nice green color, and fine for slicing and pickling. The vine and fruits being elevated do not suffer from wet weather and insects. It sets its fruit constantly throughout the season. You will be pleased with it. Pkt., 10c; 3 pkts., 25c, postpaid.

Banana Muskmelon

This Melon surpasses all others in its delicious fragrance. The flesh (the Melon being nearly solid) is of a salmon. The quality is excellent when the Melon is thoroughly ripe. It grows from 18 to 36 inches in length and from 2 to 4 inches thick, and is very prolific. It looks almost like an overgrown banana and smells like one. Has a flavor all its own. Don't fail to try it. Pkt., 10c; 3 pkts., 25c, postpaid.

Ground Almonds

Grow them in your garden. A delicious nut, with a flavor resembling the coconut or the almond. The meat is snow-white, covered with a thin shell or skin of brown color. It grows close to the surface, is very prolific, a single nut yielding from 200 to 300 nuts in a hill and will do well in any kind of soil. If the nuts are planted in the Spring the same as potatoes a big crop can be expected about potato harvest time. They grow so rapidly and produce such immense crops that you will be surprised. Plant some for the children. Everybody likes them. Send 10c for a package of these nuts, so you can grow some in your garden; or send 25c and get 3 packages.

Northern Grown Peanuts

Just as good Peanuts can be grown in the northern states as in the South, provided you plant improved Early Spanish. Everyone should plant at least a few for the children.

This is the earliest variety grown and very productive. The pods are small,

but remarkably solid and well filled with nuts of the very finest quality. Boys, here is a chance for you. Think of growing Peanuts in your own garden and having plenty of them to eat. Shell nuts carefully so as not to break inside skin, and plant as soon as ground becomes warm, about 2 inches deep in rows 3 feet apart, and from 8 to 10 inches apart in the row. Pkt., 10c; 3 for 25c, postpaid.

Golden Honey

Watermelon

A delicious yellow-fleshed Watermelon. Rich golden color, firm, crisp and glistening, sweet as honey, and fairly melts in your mouth. No hard core or stringiness. An early melon, average about 20 lbs. each, and very few seeds. Pkt., 10c; 3 pkts., 25c, postpaid.

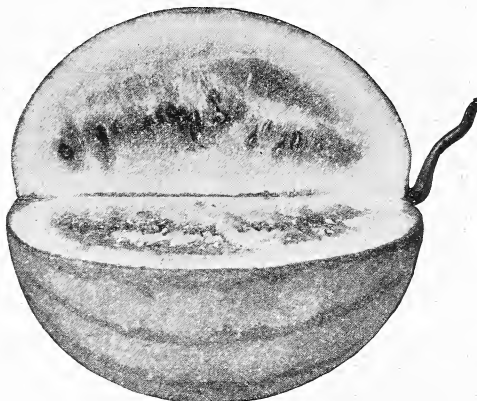

The "Chestnut Bean"

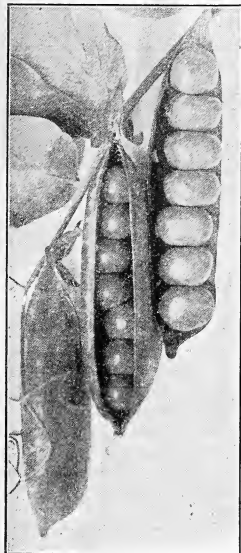

This wonderful Bean looks like a gigantic pea. When boiled it has a flavor like boiled chestnuts, and is one of the most delicious Beans grown. Grows in the form of a tall bush, and is completely covered with pods. For soup and turkey stuffing it is unsurpassed. It is a Spanish Bean, and is known as the "Garbanzo" Bean. After once you grow a few, you will want to plant a lot of them. We have but a limited amount of the seed to offer this season, so we are selling same in packets only. Pkt., 10c; 3 pkts., 25c; 7 pkts., 50c; 15 pkts., \$1.00, postpaid.

The Famous New Winter Watermelon

The fine keeping quality of this variety, apart from its palatable edibleness makes it a favorite, and gives it a special place. In a cool place it keeps long into the Winter and retains its delicious sweetness and flavor. It is early (ripens about the same time as "Sweetheart," if planted the same time), so should not be planted too early if wanted for Winter use. It is very prolific. The flesh is red, extremely firm, almost as hard as citron, very brittle, but deliciously sweet. Skin is very light green, almost white; its shape round. Our Winter Watermelon comes the nearest to perfection of any yet introduced, and we believe it will please you if you want a Winter variety. Pkt., 15c; oz., 25c; $\frac{1}{4}$ lb., 75c, postpaid.

The Famous New Winter Watermelon.

The "Mojave" Drought-Proof Pea.

The "Mojave" Drought-Proof Pea

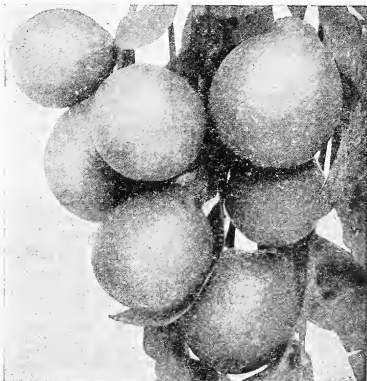

This variety will do well under a wider range of weather and soil conditions than any other variety. It will grow a crop during the driest, hottest Summer months, at a time any other variety would be a failure. In the hot, dry localities of the West this variety will grow a large crop without irrigation and without a single drop of rain falling upon it from seed time to harvest. For midsummer or late Summer planting this is the variety to plant. If it rains and the soil is kept moist this variety will produce as large a crop as any variety we know of; if it doesn't rain, and it gets hot and dry, you will get a crop anyway. The handsome round pods are well filled with from 7 to 10 peas in a pod; quality excellent, sweet and tender, even when the peas are large. Vines grow 2 feet high, and require no support. This is the Pea that will do its best in the North, South, East or West. Don't fail to give it a trial. Pkt., 10c; $\frac{1}{4}$ lb., 20c; lb., 60c; 3 lbs., \$1.50, postpaid.

The "Frost King" Hardy Lemon

The "Frost King" Hardy Lemon, like so many others of our extremely hardy fruits, comes to us from Japan. It can be grown from seed, and will fruit the third year. In the northern states the tree must be given some Winter protection. Or they may first be planted in pots, resetting in large tubs the second year, and taken into the house, where they will bear beautiful, fragrant flowers and useful fruit all Winter. The fruit is juicy, sour, round in shape, and with a thin, "kid glove" skin, reddish yellow in color. They are real lemons, and have a ready sale in local markets. A packet of seed will produce from six to ten trees. Instructions for planting are included in each packet.

In the southern states the seed may be planted in the open ground, and the little trees set out in the garden or on the lawn in the Fall. The trees are dwarf in growth, and can be set as close as six feet apart, for garden culture.

In locations where the temperature falls below zero any time, the trees, if left in the garden, should be given some straw protection. Try a packet of this useful novelty. Pkt., 20c; 3 for 50c; 7 for \$1.00, postpaid.

The "Frost King" Hardy Lemon.

Plant Medical Plants for Big Returns. See Catalog Envelope for Description.

Prices on Ginseng and Golden Seal Seed: 5 pkts., \$1.00; 12 for \$2.00; 36 for \$5.00; 80 for \$10.00, postpaid.

Prices on Ginseng and Golden Seal Plants: 6 for 75c; 12 for \$1.25; 25 for \$2.00; 50 for \$3.50; 100 for \$6.00, postpaid.

Honey Dew Melon.

"Honey Dew" The Famous New Melon

The Melon With a Most Appropriate Name

This new fruit is a cross between the Rocky Ford Cantaloupe and a South Sea Island Casaba. It is either like the muskmelon nor the Casaba, but it has retained all the best qualities of both and is better than either. The melon is nearly white, and the average size is about that of a coconut. The flesh is light green, juicy, sweet and most luscious in flavor. The rind is hard. It is good as soon as picked off the vine and will keep good for months if kept in a cool, dry place. It is therefore a good shipper and a most splendid fruit to grow for the market. One prominent shipper is urging melon growers to plant largely of the Honey Dew, saying it would put the Rocky Ford Cantaloupe out of business. In the city markets, last season, the Honey Dew sold at higher prices than any other melon, and there is every reason to believe that as soon as the productiveness, unsurpassed quality and shipping characteristics of Honey Dew become generally known it will become a standard variety and every gardener will grow it. As a local melon, it advertises itself. Our seed is the genuine, and from the choicest fruits only. Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.40, postpaid.

Chinese Celery Cabbage.

Chinese Celery Cabbage

This wonderful vegetable, although of recent introduction, has attained real popularity in California, Florida, and in many sections East and South. It is indeed a most delicious vegetable which combines the rich celery flavor with that of cabbage. It is a real salad-vegetable, having the tenderness of lettuce and the crispness of celery. Makes a good salad as the finest head lettuce. The firm, crisp heads are easily blanched. May also be cooked as greens, eaten like celery, boiled with meat, or for vegetable soups. Ready for table in 125 days. Sow the seed about August 1st, in rows where the plants are to mature, and thin out to about 15 inches. 1 ounce of seed for 300 ft. of drill. Be sure to plant Chinese Celery Cabbage and have this popular vegetable in your garden. Pkt., 10c; oz., 25c; ¼ lb., 75c.

New Guinea Butter Vine

One of the Most Delicious of All Vegetables

We are offering planters another vegetable of real worth and merit. Nearly everyone who has tried it speaks of it very highly. It is now being advertised for a few seedsmen as the New Guinea Butter Bean, which is misleading, as it is not a bean and in no way related to the bean family. The New Guinea Butter Vine is a member of the edible gourd family and in growth is similar to the squash, and can be grown in the same manner or can be trellised up. It is wonderfully prolific, considerably more productive than squash and much easier to grow. The vines are always free from disease and insect pests, and really stand more neglect and abuse than any other vegetable vine we know of.

The fruits of the New Guinea Butter Vine grow to an enormous size, but should be eaten when small, while the fuzzy growth is yet on. They can be cooked like squash, fried like egg plant, or cut up in small pieces and cooked with cream. When cooked with cream or fried it is the most delicious.

The New Guinea Butter Vine is so productive that three plants will supply an ordinary family. If trellised up, the vines take up so little space, no garden is so small but that room can be found somewhere for at least two or three plants. Pkt., 15c; 2 pkts., 25c; 5 pkts., 50c, postpaid.

Herbs

Varieties marked with an asterisk (*) are perennial.
BASIL, Sweet. Leaves used for flavoring soups, stews and highly seasoned dishes. Pkt., 5c.

BORAGE. Leaves used for flavoring. Pkt., 5c.

***CARAWAY.** Seed used for flavoring pastry, meats, etc. Pkt., 5c; oz., 15c; ¼ lb., 40c.

***CATNIP or CATMINT.** Leaves and young shoots used for seasoning. Tea made from the dried leaves is good for colds and indigestion. Grown for bee pasture and for cats. Said to be a "cure-all" for cat diseases. Pkt., 10c.

CHERVIL. Hardy annual worthy of more general use for flavoring and garnishing. More beautiful than parsley. Leaves used in soups and salads. Pkt., 5c; oz., 20c.

DILL. Leaves used for flavoring pickles, soups and sauces. Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.35.

***FENNEL, Sweet.** The leaves, boiled, are used for fish sauces, and are beautiful for garnishing. The seeds are used for flavoring. Pkt., 5c.

***HYSSOP.** The flower summits and leaves are used as a remedy for asthma and catarrh. A stimulant, expectorant and mild tonic. Pkt., 5c.

***LAVENDER.** The leaves are sometimes used for seasoning, but the plant is chiefly grown for its flowers, which are used in the making of perfumes. The dried flowers and leaves are fine for perfuming dresser drawers and linen closets, filling soft cushions, etc. Pkt., 10c.

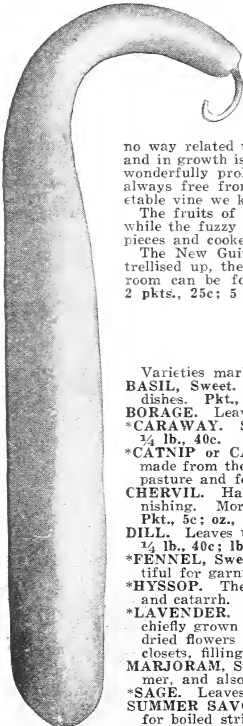

MARJORAM, Sweet. Leaves and ends of the shoots used for flavoring in Summer, and also dried for Winter use. Pkt., 5c.

***SAGE.** Leaves and tops used for seasoning and dressing. Pkt., 10c.

SUMMER SAVORY. Leaves and young shoots used for flavoring; especially for baked string beans. Pkt., 5c.

***THYME.** Leaves and young shoots used for seasoning. A tea is also made from the leaves and used as a remedy for headache. Pkt., 10c.

***WORMWOOD.** Leaves used as a tonic and as a dressing for fresh bruises. Also beneficial for poultry. Pkt., 5c.

New Guinea Butter Vine.

Dill.

Alphabetical List of Vegetables

You will find in the following pages, alphabetically arranged, the cream of all the varieties of vegetable and flower seeds which by actual test have proven themselves worthy of a place on our list of MODEL GARDEN SEEDS. You should never risk planting an inferior grade of seed, for from good seed only can good crops be grown.

Model Garden and Flower seeds are packed in tough manila envelopes, upon which is printed plainly the simple instructions for planting the seed contained in each packet.

ALL THE SEEDS LISTED ON THESE PAGES ARE SENT POSTPAID.

All our seeds are from the last harvest. They are FRESH.

All seeds are rigidly tested, and none but those of the highest germination test are allowed to go out.

You can plant your "Model Vegetable Garden" and a "Model Flower Garden" with these seeds, knowing you are planting the Best, Purest, and Highest Test Seeds that skill can produce or money can buy.

We Pay the Postage, Express or Freight

Asparagus

	Pkt.	Oz.	¼ Lb.	Lb.
Columbian Mammoth White. The best white sort.....	\$0.05	\$0.10	\$0.30	
Palmetto. The most popular variety.....	.05	.10	.30	

(For prices on Palmetto Asparagus Plants, see page 4).

Beans

Prices by the half-peck, peck and bushel furnished on application.

White Belgian (Improved Mammoth). Superior to any other sort for stock feeding. Excellent for horses and cattle.....	.10	.15	.35	

Why raise Roses for the bugs to eat? Use HALL'S TOBACCO DUST. 2-lb. box, 60c.

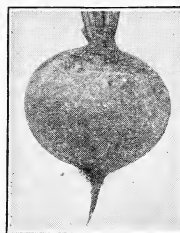

Palmetto Asparagus.

Burpee's Stringless Green Pod Beans.

Burpee's Bush Lima.

Crosby's Egyptian Beet.

Spinach Beet.

Cauliflower

	Pkt.	Oz.	¼ Lb.	Lb.
Early Snowball. Earliest variety. Our extra select strain	\$0.10	\$1.75	\$6.00	
Dry Weather. Will grow in hot, dry districts where it is difficult to grow other varieties. Extra select pedigree seed15	2.25	7.50	

Celery

Dwarf Golden Heart. A leading main crop variety10	.30	.90	
Golden Self-Blanching. The leading early variety10	.45	1.50	
White Plume. Earliest celery known10	.30	.90	
Turnip Rooted (Giant Prague). Excellent for salads and flavoring10	.25	.75	

Chicory

Witloof. Excellent for Winter salads10	.25	.75	
--	-----	-----	-----	--

Chives

Chives, or Schnittlauch. Hardy perennial; grown for the young leaves, which are used for giving a mild onion flavor to salads and various other dishes. (3 pkts., 25c)10			
--	-----	--	--	--

Collards

Georgia. A form of loose-headed Cabbage, very largely used as greens in some parts of the country, especially in the South10	.20	.60	
--	-----	-----	-----	--

Sweet Corn

Prices by the half-peck, peck and bushel furnished on application.

Adams' Extra Early. The hardest and earliest Corn for table use. It is not a Sweet Corn but on account of its earliness it is extensively planted both by the market gardener and for home use. It is sweet and tender, very productive10	.14	.40	
Country Gentleman. Late. Long kernels without rows. Excellent sort to grow where worms bother the ears, for instead of working a row into the center of the ear, they have no row to follow, and work around the end of the ear10	.15	.45	
Golden Evergreen. The finest and sweetest Corn ever introduced. A cross between Stowell's Evergreen and Golden Bantam, possessing all the splendid qualities of both of these popular varieties and better than either. Later than Golden Bantam and earlier than Evergreen10	.20	.50	
Improved Golden Bantam. Best early Sweet Corn grown10	.15	.45	
Stowell's Evergreen. Leading main crop variety10	.15	.45	

Pop Corn

Australian Hulless. Also known in some sections as Japanese Rice. Little short ears, nearly as thick as long. Almost hullless10	.15	.45	
Black Beauty. Earliest; most productive; finest flavored Pop Corn ..	.10	.15	.45	
Queen's Golden. One of the best and most prolific; large ears; excellent quality; profitable variety to grow for the market. When popped, kernels expand to a diameter of nearly an inch10	.15	.45	

Cress

Extra Curled. A salad plant that should be grown in every garden...	.05	.10	.52	
---	-----	-----	-----	--

Cucumber

Snake Cucumber (See page 8)10			
Earliest. Earliest Cucumber grown. Excellent quality10	.30	.90	
Perfecto Davis Perfect10	.30	.90	
Improved Early White Spine. A popular variety10	.25	.75	
Improved Long Green. A favorite in some localities10	.30	.90	
Westerfield's Chicago Pickling. The variety used by the leading pickle houses. Not extra for slicing, but the best for little pickles10	.25	.75	
Golden Salad Cucumber. A new variety unexcelled for salads10			
Japanese Climbing (See page 12)10			

Egg Plant

Black Beauty. The best variety grown10	.45	1.50	
--	-----	-----	------	--

Endive or Winter Lettuce

Self-Blanching. One of the most refreshing of all Autumn and Winter salads. May be grown any season of the year, but is more generally used late in the Fall. Dr. Finck, an authority on foods, recommends it as a food for persons suffering from indigestion10	.20	.60	
--	-----	-----	-----	--

Kale, or Borecole

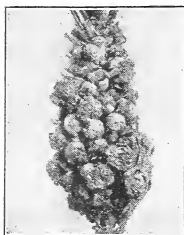

Dwarf Scotch. The best variety. Harder than Cabbage, and excellent for greens for Winter and Spring use05	.15	.40	
---	-----	-----	-----	--

Kohl Rabi

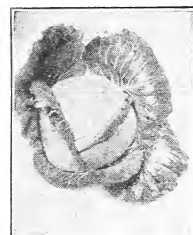

Early White Vienna. Very select, extra early strain10	.20	.60	
---	-----	-----	-----	--

Leek

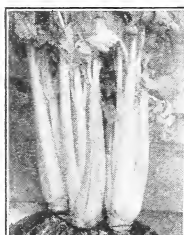

Broad American Flag. The finest variety grown; very hardy. Best for Winter and Spring use. Mild and sweet10	.20	.60	
---	-----	-----	-----	--

Brussels Sprouts.

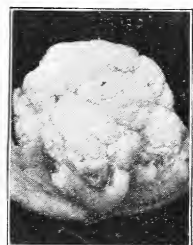

Allhead Early Cabbage.

Golden Self-Blanching Celery.

Danvers Half Long Carrot.

Early Snowball Cauliflower.

Lettuce

	Pkt.	Oz.	¼ Lb.	Lb.
Big Boston. The best head Lettuce for forcing under glass, and one of the best for outdoor planting. Produces large, solid heads, often 10 to 12 inches across. Excellent quality; sure to head.....	\$0.10	\$0.30	\$0.90	
Black Seeded Simpson. The most popular curled or loose-leaved sort for early outdoor planting10	.20	.60	
Cos or "Celery" Lettuce. (See page 8)10	.30	.85	
Grand Rapids Forcing. The best loose-leaved sort for forcing under glass and an excellent variety for outdoor planting10	.25	.75	
Improved Hanson. Will stand more hot weather than any other sort, excepting "Celery" Lettuce. Immense solid heads10	.25	.75	

Golden Evergreen

Muskmelon

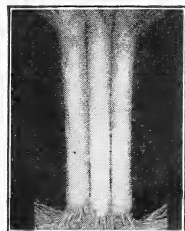

Banana10	.15	.45	
Emerald Gem. None better for home use, but is too soft to stand shipping. Salmon fleshed. Extra early10	.15	.45	
Fordhook. Equals Emerald Gem in flavor, and will carry to market even better than the famous Rocky Ford. Extra early. Salmon fleshed10	.17	.50	
Hearts of Gold or Hoodoo. The best for home and market garden10	.20	.60	
Honey Dew. (See page 14).10	.20	.60	
Osage or Miller's Cream. The favorite late variety. Fruits large, salmon flesh, thick, fine grained and highly flavored. A good shipper, and always in demand10	.20	.60	
Rocky Ford. The most famous Muskmelon10	.20	.60	

Earliest Cucumber.

Watermelon

Alabama Sweet. A popular variety in the South05	.10	.25	.75
Cole's Early. The earliest melon grown. Small in size, but what they lack in size they make up in number05	.10	.30	.90
Golden Honey. Excellent yellow-fleshed variety. Sweet as honey10	.15	.45	1.50
Kleckley's Sweet or Monte Cristo. Has the reputation of being the sweetest melon grown. On account of its thin rind it is not recommended for shipping05	.10	.30	.90
Mammoth Prize. Largest Melon grown10	.20	.50	1.75
Sweet Heart. Large round Melon. Good shipper05	.10	.30	.90
Tom Watson. Often weighs 50 to 60 pounds, and averages on good soil over 30 pounds. A melon of superb quality. The rind is not thick, but it is hard and tough, so that it is unsurpassed as a market and shipping sort05	.10	.30	.90
Winter. Keeps until late in the Winter (See page 13)10	.25	.70	
Citron. (For Preserves)05	.10	.30	1.00

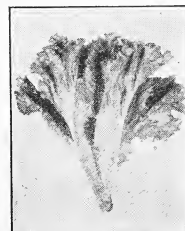

American Flag Leek.

Mustard

Southern Giant Curled. The true curled leaf variety. Ready for use in six weeks from sowing05	.15	.40	
White London. Seeds white; preferred by housewives for pickling....	.05	.08	.20	

Okra

Improved White Velvet. The best variety. Popular in the South, and can be easily grown in the North. Young seed pods fine for soups, etc.05	.10	.20	
---	-----	-----	-----	--

Grand Rapids Lettuce.

Onion

For Prices on Frost-Proof Onion Plants, see page 11.

Prize Bermuda. Yellow skin, white flesh, very mild10	1.00		
Australian Brown. Extremely early; mild flavor; good keeper, having been kept in fine condition for a year after harvest10	.30	1.00	
Large Red Wethersfield. The standard main crop dark red variety....	.10	.40	1.35	
Mammoth Silver King. The largest white Onion. Unsurpassed for tenderness and mildness of flavor10	.50	1.75	
Prizetaker, or Mammoth Spanish. One of the largest, and the most handsome yellow Onion; the mildest of all. (See page 6).....	.10	.50	1.75	
Southport Red Globe. The best round red Onion10	.40	1.35	
Southport White Globe. Extra select; the best round white Onion....	.10	.60	2.00	
Southport Yellow Globe. A favorite among Onion growers.....	.10	.40	1.35	
White Welsh. Best for early green Onions.....	.10	.60	2.00	
Yellow Globe Danvers. The most popular yellow Onion.....	.10	.50	1.75	
Ox Horn (See page 10)10			
Pear Form (See page 10)10			

Black Beauty Egg Plant.

Fordhook Muskmelon.

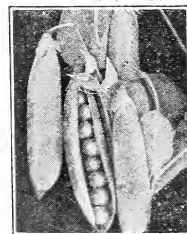

Cole's Early Watermelon.

White Velvet Okra.

Prizetaker Onion.

Little Marvel Peas.

Parsley

	Pkt.	Oz.	1/4 Lb.	Lb.
Champion Moss Curled. Finest and most handsome variety	\$.05	\$0.10	\$0.30	

Parsnips

Improved Hollow Crown. The best variety08	.15	.45	
---	-----	-----	-----	--

Peas

Prices by the half-peck, peck and bushel furnished on application.

Alaska. Earliest Pea grown. Excellent quality; exceedingly productive. Can be planted as soon as ground thaws out in the Spring...	.10	.15	.45	
American Wonder. One of the finest early Peas grown10	.15	.45	
Drought Proof. (See page 13)10	.25	.75	
Champion of England. Tall late sort; very productive; large pods, well filled with Peas of the finest quality10	.15	.45	
Horsford's Market Garden. The best and most productive main crop variety. We know this variety would please you10	.15	.45	
Laxtonian, or Blue Bantam. For a combination of extreme earliness, superb quality and unusual productiveness it is unexcelled. Vines dwarf; Peas of large size and 8 to 10 in a pod10	.15	.45	
Lima. (See page 12)10			
Little Marvel. The earliest wrinkled Pea grown10	.15	.45	
Telephone. Tall medium late variety, with large well filled pods; the very finest quality10	.15	.45	

Pepper

Chinese Giant. The largest Pepper grown; very mild. (See page 6)...	.10	.50	1.50	
Pimento. The great thick-meated canning Pepper. Sweet as an apple. Very early. Excellent for home garden10	.30	.90	
Ruby King. The most popular red sweet Pepper10	.30	.90	

Pumpkin

Big Tom, or Improved Large Field. Leading cornfield Pumpkin.....	.05	.10	.30	.90
Jumbo. Often weighs 100 to 300 lbs. Always a prize winner at exhibitions. A good pie Pumpkin, splendid keeper, and valuable for feeding purposes. Seed saved from mammoth specimens only.....	.10	.20	.50	1.75
Kentucky Field or Sweet Cheese. Sweet; excellent quality05	.10	.25	.75
Small Sugar. The very sweetest. The best for pies05	.10	.30	.90

Radish

Crimson Ball. One of the finest radishes grown. Roots entirely free from hollow center or pithy fibre, and remain in condition the longest of any of the round or turnip-shaped varieties05	.10	.30	
Early Bird, or Non Plus Ultra. The earliest variety of all. Bright scarlet. Turnip-shaped05	.10	.30	
French Breakfast. Olive-shaped; red, white tipped05	.10	.30	
Icicle. The best long white Radish. Mild and sweet05	.10	.30	
Long White Strassburg. The best Summer Radish05	.10	.30	
Nerima Long. 3 feet long. Crisp and brittle10	.35		
Sakurijima. Largest grown. Excellent quality10	.35		
Scarlet China. The best Winter Radish05	.10	.30	
Prize Mixture. (All the early varieties mixed)05	.10	.30	

Rhubarb, or Pie Plant

Early Giant. Mammoth stalks; best and earliest variety10	.30	.90	
Rhubarb Roots, 35c each; 3 for 90c; 12 for \$3.00, postpaid.				

Salsify, or Vegetable Oyster

Mammoth Sandwich Island. The best variety10	.35	1.00	
---	-----	-----	------	--

Spinach

Improved Victoria. Best variety. Remains in prime condition from 2 to 3 weeks after nearly all other sorts have run to seed.....	.05	.08	.20	
New Zealand. Especially suited to dry and arid locations where other varieties do not do well, and the only kind that can be successfully grown in hot weather10	.20	.40	

The bugs will be dead when you come back if you use HALL'S TOBACCO DUST. 2-lb., box, 60c.

Squash

	Pkt.	Oz.	¼ Lb.	Lb.
Delicious. The sweetest Squash grown	\$0.05	\$0.15	\$0.40	
Genuine Hubbard. Most popular Winter variety05	.15	.40	
Golden or Red Hubbard. A week earlier than Genuine Hubbard05	.15	.45	
Giant Summer Crookneck. Best Summer Squash05	.12	.35	
Mammoth White Bush Scallop. Best Summer Squash for shipping to distant markets, but not as good eating as Crookneck05	.15	.40	
Cocozelle Bush or Italian Vegetable Marrow (See page 8)10	.20	.60	

Tobacco

You may or may not have a grudge against the Tobacco Trust, but what's the use of spending your money for Tobacco when you can easily grow your own and be sure of having a good supply of pure unadulterated natural leaf for either smoking or chewing that has not been "roped" or "doctored" up by the manufacturer. A packet or two of seed will grow enough to supply most anyone.

	Pkt.	Oz.	¼ Lb.	Lb.
Connecticut Seed Leaf. The best variety to grow in the northern and middle states. Can be successfully grown in the far North	\$0.10	\$0.45	\$1.50	
Fine Havana. Choice seed from an extra select strain10	.45	1.50	
Improved White Burley. (Extra select strain.) Popular variety for chewing10	.50	1.75	

Tomato

Benny Best. Very early, vigorous and productive, color scarlet10	.45	1.25
Earliest and Best (See page 4)10	.50	1.50
Chalk's Early Jewel. Large, smooth, extra early bright red Tomato. Considered by many to be the best early sort10	.40	1.25
Dwarf Stone. Is the best of the dwarf growing sorts. The fruits, which hang well up off the ground, are nearly as large as those of the original Stone, and excellent in quality, smooth, meaty and solid. Dwarf varieties do not produce as many fruits to the plant as the larger sorts, but owing to their small size and upright growth twice as many plants can be set in the same garden space10	.50	1.50
Golden Queen. Large yellow Tomato10	.50	1.50
June Pink. The earliest pink variety. Same season as Sparks' Earliana, but larger; quality excellent10	.50	1.50
Livingston's Globe. The most popular variety in the South for shipping to northern markets10	.50	1.50
Ponderosa. Largest Tomato grown; nearest seedless of any variety10	.50	1.50
Red Cherry. Small fruited sort. Fine for preserves10	.50	1.50
Sparks' Earliana. Standard extra early red Tomato10	.40	1.25
Stone. The old standby. Large, bright red, perfectly smooth, main crop Tomato. The standard by which all other varieties are judged10	.30	.90
Yellow Pear. Small yellow fruits; pear-shape; very sweet. Fine for preserves and eating out of hand. Plant a few for the children10	.50	1.50
Long Form Tomato (See page 6)20		

Turnip

Amber Globe. The best large yellow late sort05	.10	.25
Early Purple Top Strap Leaf. The standard early variety05	.10	.25
Extra Early Purple Top Milan. Earliest Turnip grown05	.10	.30
Purple Top White Globe. One of the most popular05	.10	.25
Shogoin Mammoth. Mammoth variety from Japan10	.35	
White Egg. An excellent variety05	.10	.25

Rutabagas, or Swedes

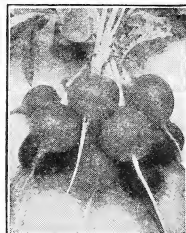

Improved Purple Top Yellow. The best yellow variety05	.10	.25
Monarch, or Elephant. Mammoth size; yields enormous crop05	.10	.30
Sweet Russia. Excellent keeper; flesh white, very firm and sweet05	.10	.30

The bugs will be dead when you come back if you use HALL'S TOBACCO DUST. 2-lb. box, 60c. Feed Your Plants. Keep lawns fresh and green. Use STIM-U-PLANT. 30 tablets, 25c; 100 tablets, 75c.

If you want larger crops, use WIZARD Sheep Manure. 50 lbs., \$1.50; 100 lbs., \$2.50 not prepaid.

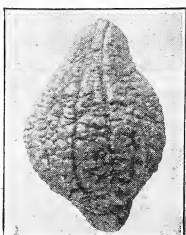

Chinese Giant Pepper.

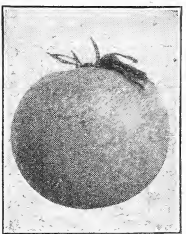

Early Bird Radish.

Early Giant Rhubarb.

Gaillardia.

Gaillardia Grandiflora (Blanket Flower)

Among the most attractive and effective of our hardy perennial plants. Will thrive in almost any position or in any soil. A mass of bloom from June until freezing weather. The gorgeous flowers, 2 to 3 inches in diameter, dark red-brown in center, with bands of crimson-orange and vermillion, are borne on stems 18 to 24 inches long. Excellent for cutting, and when used for filling in front of shrubbery Gaillardia adds a dash of color which is every effective. Pkt., 10c.

Gourds.

Sensitive Plant "Mimosa Pudica"

An interesting and curious plant with globular heads of pink flowers. It affords much amusement by its sensitive character. Even when touched slightly, the leaves instantly close and droop for a short time. Pkt., 5c.

The Great Japanese Umbrella Palm

A graceful and handsome House Plant, easily grown from seed Winter or Summer. The Japanese Umbrella Palm is a semi-aquatic plant. It is easily grown from seed either in a bowl of water or in very damp soil. Probably the most useful, as well as the most interesting method, is to grow the plant in a bowl or jardiniere filled with water, with two or three inches of good garden soil at the bottom. The seeds soon commence to germinate, and the plant shoots up stems two or three feet high, and rapidly assumes a pretty palm-like appearance, as shown in the engraving. The tops of the stems are surmounted by a whorls of umbrella-shaped leaves of a waxy appearance. We will send you a packet of this seed for only 15c, or two packets for 25c, postpaid.

Model Giant Dahlia-Flowered Zinnia

This fine novelty resembles the great show Dahlia in form and is nearly as large. The plant is a strong grower and flower stems are long and stiff. This remarkable variety includes a complete range of bright and rich colors and is a wonderful cut flower. Pkt., 25c, postpaid.

New Curled and Crested Zinnia

The petals are elegantly twisted and curled, giving the flower a most attractive appearance. The plant grows 18 inches high by 2 to 2½ feet in diameter, and blooms freely until killed by severe frost. The colors range from white through many shades of yellow, rose, pink and salmon, to deepest crimson. The new Curled and Crested is a grand cut flower which will last a considerable time in water. Pkt., 10c; 3 pkts., 25c, postpaid.

Mallow Marvel.

from July until October. Pkt., 10c, postpaid.

Ornamental Cotton

Many people in the North have never seen cotton growing. It is by far a more beautiful plant than many of the ornamentals and can be successfully grown in the North for ornamental purposes. It makes a very desirable addition to any flower garden. This is a great novelty for the northern gardener, and always attracts the attention of both the grown-ups and the children. Start seed early and transplant. Has large, showy flowers, followed by large fluffy balls of white cotton. Pkt., 5c; 3 pkts., 10c, postpaid.

Ornamental Gourds

Rare, useful and ornamental varieties, such as Dipper, Nest Egg, Japanese Bottle, Dish Cloth, Pear-Shape, Pomegranate, Sugar Trough and Calabash Pipe, all varieties, mixed. 5c per pkt.; 3 pkts., 10c.

Umbrella Palm.

Jerusalem Cherry

A very showy pot plant, loaded with "cherries," which turn to glossy scarlet when ripe. Fine for Thanksgiving and Christmas decoration. Plant the seed in pots indoors, transplanting the plants to the garden in Summer. In late Summer they will be loaded with the bright cherries and may be potted and taken in the house. The cherries will hang on the plant all Winter. Foliage is always green and very ornamental. The fruit, however, is not edible. Pkt., 10c; 3 pkts., 25c, postpaid.

Giant Mallow Marvel

Mallow Marvels are a wonderfully improved form of our greatly admired Marsh-mallow or Hibiscus, in which flowers of enormous size, frequently 10 to 12 inches in diameter, have been developed. A robust type of upright habit, growing from four to seven feet high, and producing an abundance of flowers in all the richest shades of crimson, pink, and white. These hardy perennial plants can be highly recommended for all kinds of plantings and appear to be equally at home in all positions, having the same vigor in dry and wet ground and are as hardy as an oak. Bloom continually

Zinnia.

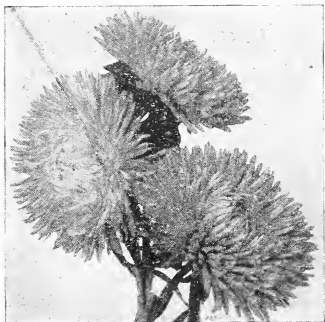

Japanese Giant Chrysanthemum

The Chrysanthemum is the queen of Autumn flowers, nothing is more beautiful as house plants, in the late Fall and early Winter, than these large fluffy Japanese varieties. For massive blooms, grandeur of colors, ease of culture and certainty to flower there is no plant that will surpass them. The endeavor of nearly all growers has been, in late years, to introduce varieties which will produce the largest and finest blossoms for exhibition purposes. It is from these varieties that this seed is saved. These plants are easily raised from seed. Almost all the new and striking varieties are the result of plants grown from seed, and the amateur is as liable to originate new and splendid varieties as is the professional florist. They are of the easiest culture and always give satisfaction as house plants. The blossoms you get will surprise you with the odd and beautiful forms of the flowers and abundance of bloom. If you want a magnificent collection of these gorgeous Chrysanthemums—red, white, yellow and pink—you will make no mistake in getting a packet of our select seed. This seed is not sold in any seed assortment or mixture, and the only way to be sure of getting the genuine is to buy it in our sealed packets.

We sell the seed in sealed packets only, and guarantee it to be from the genuine large-flowering Japanese varieties. Pkt., 50¢; 3 pkts., \$1.00, postpaid.

Giant Chrysanthemum-Flowered Comet Aster

Our select strain of Giant Chrysanthemum-Flowered Comet Aster is the first of all. Finer and larger than the much advertised Asternum. The plants grow 18 to 24 inches in height, branching freely, each plant bearing from 20 to 30 magnificent flowers from 4 to 6 inches in diameter, with long, curled, twisted petals, forming loose, fluffy, globular heads, and resembling fine Japanese Chrysanthemums. All colors mixed. Pkt., 10¢; 3 pkts., 25¢, postpaid.

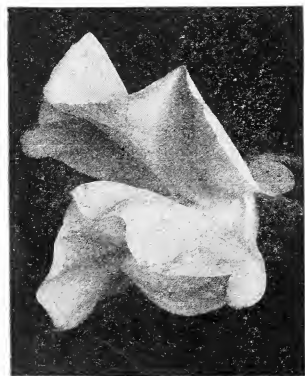

Comet Aster.

The Poppy, the first official flower of the American Legion, has been associated in the minds of men for over 200 years with the battlefields of Flanders. Poppies also deserve a place of prominence because of their beauty, for which they are noted. With their satiny flowers of silk-like texture and many brilliant color combinations and delicately borne flowers, they are indeed, beautiful. You will find in this Shirley Mixture beautiful, large size Poppies of dazzling and brilliant color. They are borne on long stems and will keep a long time when cut in bud. Poppies are easily grown. Nothing could be more beautiful to behold than a bouquet of these beautiful Shirley Poppies. Pkt., 10¢; 3 pkts., 25¢, postpaid.

Gorgeous Sweet Peas—Spencer's Mixture

The Spencer, or Giant Ruffled, is the finest type of Sweet Pea grown. Beautifully formed flowers, many measuring more than 2 inches across, with petals daintily waved and ruffled. Unsurpassed as cut flowers. This very select mixture is composed of the very finest varieties, and is one of the most gorgeous mixtures of Spencers ever offered. It contains the cream of the very finest named Spencer varieties, including many recent novelties, and superb new seedlings not yet introduced. It is the very best blend possible to produce and will surely delight all who want a grand variety of shades and colors. Pkt., 10¢; 3 pkts., 25¢, postpaid.

Spencer Sweet Pea.

Chinese Woolflower

Many beautiful flowers have come to us from China, and among the leaders will be found the Chinese Woolflowers. The plant grows from 2 to 3 ft. high, the blooms starting early with a central head, branching freely, each shoot bearing beautiful ball-shaped flower heads of purplish crimson resembling a ball of bright colored wool. Plants look like immense bouquets nicely arranged and placed in the ground. Flowers profusely during the Summer and Fall months and makes a gorgeous show. Flowers cut fresh and carefully dried retain their shape and wonderful color. Very easy to grow. You should have Chinese Woolflower in your garden. Pkt., 10¢; 3 pkts., 25¢, postpaid.

Shirley Poppy

The American Legion Flower

Chrysanthemum.

Chinese Woolflower.

Giant Flowered Pansy

The flowering marvels of beauty in this special mixture is the finest thing out in Pansies. A wonderful collection of extra flowering Pansies of surpassing beauty in coloring. Plants are hardy and free flowering. Pansies are always a favorite with children. Pkt., 25¢; 3 pkts., 50¢, postpaid.

Ice Plant

A fine plant for sunny borders and also for dry sunny situations on banks, rock-work, old walls, etc. Foliage is very beautiful, being covered with ice-like globules. Useful for garnishing. Tender annual, growing about 6 inches high. Pkt., 10¢; 3 pkts., 25¢, postpaid.

Giant Flowered Pansy.

Giant Cyclamen

Cyclamens are, without question, one of the best and most beautiful house plants. Our Cyclamen seed is grown for us by a specialist, seed being selected only from plants of superior bloom and foliage. The flowers are unsurpassed for size, color and substance. The seed we offer is a mixture of bright red, dark red, light pink, deep pink, salmon, white, white with carmine eye, etc. In fact, the colors range from white to darkest crimson, with all intermediate shades. Seed should be sown in shallow pans containing a mixture of finely sifted soil and leaf-mold. Keep warm and moist until the seeds sprout, which usually takes four weeks. When the plants are large enough to handle, they should be transplanted into small pots to be repotted into larger ones as the plants increase in size. Pkt. (15 seeds), 25c.

Blue Lace Flower

This is a beautiful Australian annual which is becoming very popular on account of its soft blue color, graceful form and beautiful lace-like flowers. The Blue Lace Flower grows into an upright, very much branched plant of about 2 feet in height. Each branch ends in an umbel of light sky-blue flowers which spread out in an umbrella-like fashion, crowning each shoot with a beautiful and delicate head of flowers. The name Blue Lace Flower is most appropriate since the blossoms resemble the most delicate and dainty lace. The many large flower clusters are composed of a great mass of florets on long graceful stems, are unsurpassed for cut flowers and last unusually long in water. It is very easily grown, blooms freely in the garden from July to October, or until the first hard frost. Pkt., 10c; 3 pkts., 25c, postpaid.

Cyclamen.

Eschscholtzia or California Poppy

Burbank's Crimson

California's state flower. Dwarf plants about 1 foot high, with spreading, silvery, fine cut foliage; furnishing a liberal quantity of poppy-like flowers from Spring until late Fall. In addition to the original yellow, the class is now enriched by various color shades. Produce beautiful effects either as border plants or in masses. Hardy annual. Pkt., 10c, postpaid.

Hyacinth Bean (Dolichos)

A rapid growing annual climber, making about 10 feet. They bloom freely in large, upright racemes of pea-like flowers, either white or purple; followed by ornamental purple seed pods. Sow seed in April or May. Mixed. Pkt., 5c, postpaid.

Eschscholtzia
or California Poppy.

Everlasting Flowers—
Helichrysum.

Everlasting or Strawflower

Beautiful Aster-like flowers that, when dried, retain much of their original shape and splendor. Popular for Winter decorations, and most showy when arranged in bouquets with ornamental grasses or Gypsophila Paniculata. The blossoms should be cut as soon as they open, tied in small bunches, and dried slowly in a cool, shady place, hanging the flowers downward to keep the stems straight. We can supply seed in the following separate colors: crimson, purple, rose, golden yellow. All colors mixed. Pkt., 10c; 3 pkts., 25c.

Kochia Summer Cypress or Burning Bush

An annual plant of ideal character for temporary Summer hedges. Makes a feathery dense egg-shaped bush ranging from 2 to 4 feet according to soil. Foliage is so fine and close-set, the bush resembles a formally clipped evergreen, although soft enough to ripple. Pale, tender green throughout Summer, the color turns towards Fall to vivid red. Sow thinly in Spring for an unbroken line, but for individual expression transplant to 18 or 24 inches apart. Pkt., 5c, postpaid.

Kochia.

New Pres. Harding Sweet Pea

The outstanding value of this wonderful introduction is apparent from the many first-class awards given to it. The President Harding has been accepted both in America and England for its superiority and popularity. The American Sweet Pea Society gave it the only SILVER MEDAL for the finest new Sweet Pea. The National Sweet Pea Society of Great Britain awarded it the only CERTIFICATE OF MERIT for two years. It is the first American Sweet Pea that has received an Award of Merit from the English Sweet Pea Society.

The President Harding represents a nearly perfect Sweet Pea. The flowers are of immense size, bold and impressive, yet of excellent proportion and exquisite texture.

The President Harding is an entirely new color of Sweet Peas. The flowers are peach red or salmon-cerise suffused orange. Although a rich color, it is soft and pleasing, standing up well under strong sunlight. The bunch effect is lovely whether displayed during the day or under artificial light.

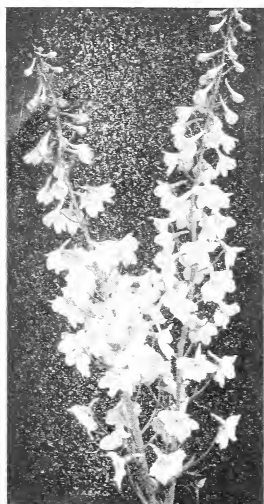

The President Harding is a foremost exhibition variety. The plants make a strong and sturdy growth and produce an abundance of long flower-stems. Each stem displays four exquisite flowers in an artistic arrangement. Pkt., 20c; 3 pkts., 50c, postpaid.

Snow-on-the-Mountain

One of the very finest of all outdoor foliage plants and easy to grow. The leaves are a rich pale green with a deep edging of white and will add to the beauty of any flower bed. Pkt., 5c, postpaid.

Selected Hardy Perennial Flower Seed

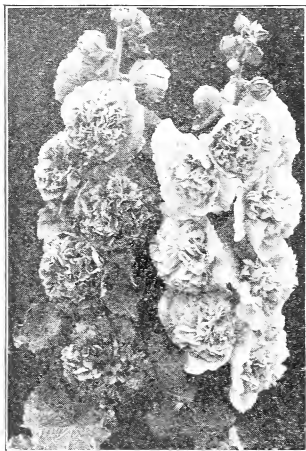

There is nothing which gives more satisfaction than a well arranged Perennial Flower Garden. While natural and restful in effect, their beauty is ever-changing and varying in its range of color, for you can find flowers there all the season long. Perfectly hardy in the open ground; they die down in the Winter and begin growth naturally each Spring. Failure with them is practically impossible.

Delphinium.

Dianthus Hardy Garden Pinks

The old favorite Clove or Hardy Garden Pinks with double and semi-double carnation-like flowers. They are very sweet scented, early blooming and free flowering. Unequaled for borders of beds, drives and the old-fashioned garden, and should be planted generously in any rich garden soil where they can get the full benefit of the sun. Pkt., 10c, postpaid.

Double Hollyhocks.

Alyssum

Deep, pure yellow flowers, of surpassing beauty. Begins to bloom early in the Spring and is very select for front borders and edgings. Seed may be sown very early in the Spring and up to June 15th, also for early Spring flowers. Will resist the most severe weather. Pkt., 5c, postpaid.

Anemone - Windflower

A very beautiful poppy-like flower of the Fall blooming class. It blooms alone on a long stem, but the flowers are numerous and large. It is ideal for bouquets in vases. Will bloom the first year if the seed is planted early and kept shaded until the plants appear, but Fall plantings appear to succeed the best. All colors mixed. Pkt., 10c, postpaid.

Hardy Pinks.

Bellis Double Daisy

Grows two feet high and blooms from June to October or until frost kills it. Their long flowering period, long stems and bright colors make them one of the most valuable perennials and they are easily grown in any ordinary garden soil. Pkt., 10c, postpaid.

Double Hollyhocks

There is nothing finer nor more easily grown than the Hollyhocks. Tall spikes of bloom, some of them growing over five feet and in a wide range of color, blooming all through the season. Will bloom the first season if planted early or they may be planted in the Fall. Pkt., 10c, postpaid.

Anemone.

Delphinium - Larkspur

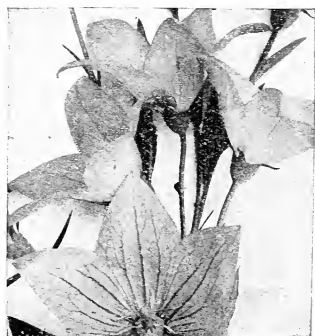

The Perennial Delphinium or Larkspurs are among the most useful and prolific of all flowering plants for the garden. Blooms all Summer and is unsurpassed for its display of the various shades of blue. Easily grown from seed. Pkt., 10c, postpaid.

Perennial Sweet Peas

A superfine mixture of all colors of Sweet Peas and there is nothing which rivals them in their generous supply of cut flowers. They will grow anywhere you can raise the common garden pea and will bloom all Summer. For larger blooms of greater beauty, fertilize liberally with manure or any good fertilizer. Pkt., 10c, postpaid.

Platycodon - Bellflower

A hardy perennial that blooms the first year. Large blue and white bell-shaped flowers on well-branched bushes two to three feet high. A welcome addition to any garden and a very hardy, free bloomer. Pkt., 10c, postpaid.

Platycodon.

Hardy Ornamental and Flowering Shrubs

ALTHEA (Rose of Sharon). A very hardy shrub of rapid growth. Flowers profusely in the late Summer and Fall, after other flowers are all gone. Not affected by insects. Grows 12 feet high. 25c each; three for 60c, postpaid.

BUTTERFLY BUSH. The most perpetual bloomer and one of the finest of all shrubs. Beautiful lilac-colored flowers, attracts a myriad of butterflies which only add to its beauty. Grows four to six feet high. Each, 65c; three for \$1.75, postpaid.

BARBERRY THUNBERGI. An unequalled shrub for hedge plantings. Yellow flowers in June with a foliage of dense growth, with gracefully drooping branches. It may be trimmed if desired. Grows three feet. Each 30c; three for 75c, postpaid. Special prices in lots of 50 or more.

CORNUS FLORIDA (Dogwood). A beauty of early Spring. White flowers three inches across, streaked with yellow, red and purple, are borne in profusion before the leaves appear. Grows 15 feet high. Each, 25c; three for 60c, postpaid.

CORALBERRY (Symphoricarpos). Through Spring and Summer the Coralberry is loaded first with bright red blossoms and then with glossy crimson berries that remain through the Winter. Grows four feet high. Each, 25c; three for 60c, postpaid.

DEUTZIA (Pride of Rochester). One of the finest shrubs ever introduced. The long, slender branches are bent to the ground with their loads and wreaths of rosy-white, tassel-shaped flowers, through the Summer. Grows four to six feet. Each, 30c; three for 75c, postpaid.

FORSYTHIA (Golden Bell). Very early in the Spring, often before the snow is gone, this handsome shrub is entirely covered with golden-yellow, bell-shaped flowers. Branches cut off in the Winter and placed in a vase of water in the house will bloom profusely. Grows six feet. Each, 30c; three for 75c, postpaid.

FLOWERING CATALPA. An ornamental tree of rapid growth and marvelous beauty. Large heart-shaped leaves measure six inches across. About the third year it begins to bear immense, pyramidal clusters of fragrant, waxy, white flowers, streaked with red, purple and yellow. Grows 20 feet high. Each, 20c; three for 50c, postpaid.

HYDRANGEA (Snowball). This beautiful and stately shrub is a mass of snowy-white balls of flowers that almost conceal the foliage throughout the Summer. A welcome addition to any shrub collection, and the most popular of all. Grows three to four feet. Each, 50c; three for \$1.25, postpaid.

HYPERICUM. Bright golden flowers two inches across are borne in profusion during the Summer and Fall. Very hardy and one of the most popular shrubs. Grows four feet. Each, 25c; three for 60c, postpaid.

REDBUD (Cercis Canadensis). Even before the leaves are out in the Spring, every branch and twig is covered with wreaths of rosy red flowers and buds, ushering in early Spring with a riot of crimson color. With its large heart-shaped leaves it affords excellent shade after the flowers are gone. Grows 15 feet. Each, 30c; three for 75c, postpaid.

SPIREA ANTHONY WATERER (Red). Handsome round bushes three feet high and as wide. Begins to bloom in June and continues until Fall. Rose-red flowers are borne in full flat clusters all over the bush. Each, 75c; three for \$2.00, postpaid.

SPIREA VAN HOUTTEI (Bridal Wreath). A leader among shrubs, and a beautiful ornament at all seasons. Excellent for clump plantings. In May and June the arching branches are covered with masses of little white flowers. Grows six feet. Each, 25c; \$2.50 per doz, postpaid. Special prices in quantities.

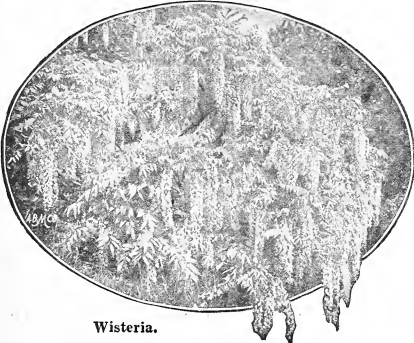

Hardy Climbing Vines

CELASTRUS SCANDENS (Bittersweet). A most desirable climber, with bright glossy foliage, and especially prized for its clusters of artistic orange berries, which are borne in profusion in the Fall. Always plant at least three vines to secure good coverings of fruit. 2-yr., each, 50c; three for \$1.25, postpaid.

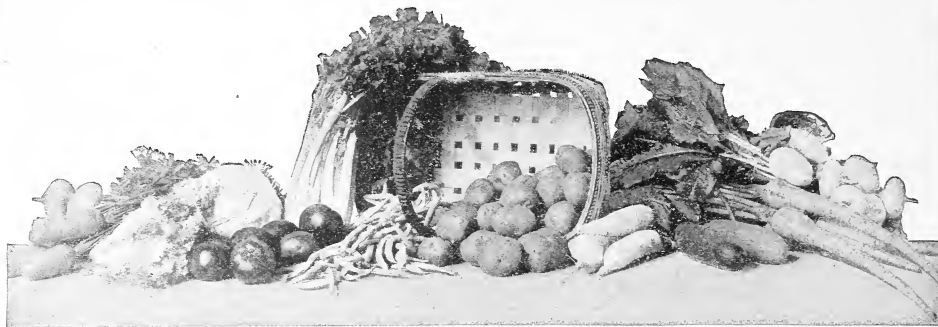

HONEYSUCKLE (Hall's Japanese). Fragrant white and creamy yellow flowers bloom the season through, followed by brilliant scarlet "fruits" of arresting beauty. Each, 25c, postpaid.

TRUMPET VINE (Bignonia Radicans). A rapid climber that will grow to your roof if you let it. Large clusters of orange-red, trumpet-shaped flowers bloom all Summer long. It is also attractive for its foliage. Each, 25c, postpaid.

WISTERIA MAGNIFICA. A strong, rapid-growing vine, with foliage of an evergreen nature and purple lilac, pea-shaped flowers, borne in dense, long racemes before the opening of the foliage. Each, 45c, postpaid.

Wisteria.

16 Large Packets 75c Postpaid

Model Oriental Flower Garden

This is a special collection of Japanese and Chinese flower seeds; rare, curious, showy, and most handsome varieties, entirely adapted to our climate. It is from Japan that we obtain many of our most beautiful flowers, such as Chrysanthemums, Irises, Lilies, Peonies, Oriental Poppies, etc., and many of our rarest, most curious effective and showy varieties come from China. This Oriental Flower Garden contains a large assortment of varieties, all put up in one package. It would be expensive to buy them all in separate packets, as many of the varieties are very scarce and not even offered by us in separate packets. Full directions for planting are sent with each package. This fine Oriental seed assortment will please you. Complete assortment (one package) 10c; 3 for 25c, postpaid.

Model Perennial Flower Garden

Every garden should contain a good assortment of perennial plants, as they remain in the ground year after year and require very little care. An easy and inexpensive way of obtaining them is to send for our Perennial Flower Seeds Package of 25 varieties. Package, 10c; 3 for 25c; 7 for 50c, postpaid.

Model Wild Flower Garden

Hundreds of Varieties of Pretty Flowers. At practically no cost the Children's Garden can be transformed into a delightfully attractive spot, overflowing with charm and fascination in its quaint, exquisite beauty, and forming the most instructive of schoolrooms and the happiest of playgrounds. This mixture is especially prepared from a select list of hundreds of sorts—the colors and varieties being carefully proportioned to produce a constant and varied bloom the whole season, and will be found superior to any mixture before offered. In no other manner can so many different and rare varieties be obtained at such a small cost. It is suitable for any bare or unsightly spot in the yard, to sow along fences, embankments, etc. Pkt., 5c; oz., 20c; ¼ lb., 60c, postpaid.

Model Flower Seed Collection

Beautify your place by planting some choice flower seeds. This assortment has been carefully selected for the person who wants a beautiful yard without spending any unnecessary money to secure same. This is a grand collection of flower seeds, each kind in a separate packet, and the most select and handsome varieties ever offered at so low a price. One full-size packet of each of the following:

ASTER, Extra select mixture	5c

16 Large Packets 75c Postpaid

Apples

YELLOW TRANSPARENT. The finest of the early Summer yellow Apples.

RED ASTRACHAN. One of the best early red Apples.

EARLY HARVEST. A large yellow Summer Apple. Flesh is very sweet.

FAMEUSE (Snow). One of the finest Fall Apples grown. Deep red skin, white flesh, with peculiar winery flavor.

WEALTHY. Of all the Fall Apples this is the favorite.

MAIDEN BLUSH. An Apple of desirable quality. Finds a ready demand in all markets.

DUCHESS. A general favorite everywhere; a fair keeper.

GENUINE DELICIOUS. The handsomest Apple grown and a leader on the market.

JONATHAN. One of the best and most popular of all Winter Apples.

BALDWIN. One of the most dependable varieties that can be grown.

GRIMES GOLDEN. The finest yellow Winter Apple.

STAYMAN WINESAP. An excellent red Winter Apple of rare quality.

WOLF RIVER. A Winter favorite. Large, yellow skin shaded with streaks of red.

We can only supply two-year-old trees in the following varieties: Yellow Transparent, Jonathan and Genuine Delicious.

This is a block of some of the Apples listed here and grown on our nursery farm, and we offer you only selected trees in the varieties listed. Plant more Apples, they will richly repay your efforts.

Prices, 1-year-old trees, each 30c; 10 for \$2.75; 100 for \$25.00.

Prices, 2-year-old trees, each 55c; 10 for \$5.00; 100 for \$45.00.

All charges prepaid.

"BABY APPLE TREES"

There has been a decrease of over eight million Apple trees in the past ten years, caused by the unchecked ravages of diseases and insects. The country needs more Apple trees and you can easily grow your own Apple trees from our vigorous, rapidly growing Baby Apple Trees.

The Most Popular and Profitable Varieties

Note. Varieties preceded by an asterisk (*) are Siberian or Russian varieties, and can be grown in very cold locations on account of their extreme hardiness.

Summer Apples

***YELLOW TRANSPARENT.** The very earliest Apple to bear and the earliest to reach maturity. It frequently sets blossoms the first year, in the nursery row. The skin is a pale yellow. The flesh white, crisp, juicy, mildly sub-acid. Bears profusely, late June to August.

***RED ASTRACHAN.** Another hardy Russian variety. Yellow, overcast and streaked with red. Flesh sweet, juicy, and of remarkably attractive flavor. Begins to bear when the tree is very small. July to early September.

EARLY HARVEST. Pale yellow skin. A larger Apple than Yellow Transparent, and of better quality. Flesh is sweet and juicy. Makes a favorite cooking variety if not allowed to fully ripen. August and September.

Fall Apples

***FAMEUSE (Snow).** The most desirable of the Fall varieties. Deep red skin, pure white flesh, crisp, sweet, juicy, and with a peculiar winery flavor. The tree is a rapid grower. Probably one of the most profitable Apples grown. Medium size, smooth, round, of fine quality and a splendid keeper. Tree matures early; bears a large crop every year.

MAIDEN BLUSH. A beautiful Apple of desirable quality. Light yellow with a red "blush." The flesh is crisp, juicy, and of sprightly flavor. Ready demand in all markets.

***DUCHESS OF OLDENBURG.** A large yellow Apple, prettily streaked with crimson, and borne in abundance throughout the Fall. The flesh is crisp, juicy, sub-acid. Fair keeper; a general favorite everywhere.

Winter Apples

GENUINE DELICIOUS. The handsomest Apple grown. Inverted pear-shape. Deep red, shading to golden yellow. The flesh is fine grained, melting, and of wonderful flavor and aroma. The tree matures early and yields a fair crop of the very finest Apples.

JONATHAN. A medium size, bright red Apple that succeeds and is a favorite wherever Apples can be grown. Flesh is firm, tender, juicy, and of delightful flavor. A standard Winter Apple.

BALDWIN. Large, bright red, with crisp, juicy flesh, this grand old variety is one of the most dependable varieties that can be grown.

***GRIMES GOLDEN.** A very hardy variety. Rich, golden yellow skin, flesh sweet, tender and juicy.

STAYMAN WINESAP. Large, prolific; deep red skin, flesh of excellent quality. A decided improvement over the old Winesap in every respect.

MCINTOSH. Large, deep crimson, and beautiful. Tree is hardy and vigorous. Flesh pure white, crisp and very tender. A good regular bearer. Has justly proved itself a favorite in the Apple belt, and a good market variety. November to January.

How to Grow Apple Trees

With each shipment of "Baby Apple Trees" we include our Illustrated Leaflet: "Growing Apple Trees." By following the simple, easily workable instructions on this Leaflet, you will have the best of success in growing Apple trees.

Postpaid Prices on "Baby Apple Trees"—Five for 50c; twelve for \$1.00; one hundred for \$5.50; five hundred for \$25.00.

A Baby Apple Tree as it looks all ready to plant. 1/4 actual size.

From Photo Showing Block of Our Young Grapevines.

Grapevines

Of all the fruits there is none that offers such an opportunity for investment or that has such a wide variety of uses as the Grape. A few vines will supply your table with fresh, colorful and healthful fruit and will fill your cellar with jelly, jam, conserve, grape butter, grape juice and various other delicacies that put an edge on the appetite.

CATAWBA. A great wine Grape; color dull copper red, with sweet musky flavor. Excellent keeper.

CONCORD. The leading purple Grape and the favorite everywhere and for every purpose. The clusters are large, solid, compact and well shouldered.

MOORE'S EARLY. Larger and darker than the Concord, and possibly a little sweeter. Rather large, loose clusters; a week or ten days earlier than the Concord, but not as good a cropper.

WORDEN. A seedling of the Concord, from which it inherits many good qualities. It is larger, yields almost as heavily and ripens a week earlier.

DELAWARE. A favorite red Grape, having a delicious, spicy flavor and very sweet. Medium size clusters, very compact and borne in great profusion. Ripens early and is excellent for jelly and grape juice.

NIAGARA. A greenish white Grape that is so similar in quality, size and flavor to the Concord that it has often been called the "White Concord." It yields heavily and ripens with the Concord and should have a place in every garden.

Prices of Concord Grapevines: 1-year-old vines, each, 20c; 10 for \$1.50; 50 for \$6.50. Two-year-old vines, each, 30c; 10 for \$2.50; 50 for \$10.00. All charges prepaid.

Prices of Varieties: Moore's Early, Catawba, Delaware, Niagara and Worden, 1-year-old vines, each 30c; 10 for \$2.50; 50 for \$10.00. Two-year-old vines, each 40c; 10 for \$3.50; 50 for \$15.00. All charges prepaid.

Special prices on quantity lots sent on request.

Pears

BARTLETT. The best early Pear. Large, juicy, buttery flavored and very productive. Ripens late August and September.

***KIEFFER.** The well known canning Pear. Noted for its hardness and bearing qualities. Ripens October and November.

Prices, each 60c; 10 for \$5.00; 50 for \$20.00; 100 for \$35.00. All charges prepaid.

Callused Grape Cuttings.

You Can Grow Your Own Grapevines

You can easily grow your own Grapevines from our Callused Cuttings and save many dollars; and in a short time you will have large vines full of big, luscious clusters of Grapes. Our cuttings are made from selected Pedigreed Grapevines and then they are buried in a pit, being covered with several inches of earth until they "calluse" or heal over on the end. They are then ready to plant, and they will grow on almost any soil where they can get moisture enough to allow the root to start. Callused Cuttings can only be supplied in the Spring, so order early to insure delivery. You can have a red, white and blue Grape vineyard of the following varieties at a fraction of what you would pay for the vines.

CONCORD. The favorite blue Grape everywhere and the leading commercial Grape in Michigan.

DELAWARE. Its delicious spicy flavor makes it the most popular red Grape. A favorite for juice and jelly.

NIAGARA. The white Grape without a fault. Often called the "White Concord" because of its similarity in size and flavor.

Postpaid prices on Callused Grape Cuttings: 12 for 50c; 30 for \$1.00; 100 for \$2.25.

Peaches

There are many varieties of Peach trees and we offer only those varieties which have proven their adaptability to all conditions and climates. Every Peach tree you plant will pay liberal dividends in choice fruit for your table. All standard planting size, 3-ft. stock.

ELBERTA. The most generally planted Peach and appears to succeed everywhere. A deep crimson blush over a golden yellow skin.

J. H. HALE. A very popular Peach with the commercial growers, and the equal of Elberta in every way. Larger and earlier than Elberta and will produce a larger crop.

BELLE OF GEORGIA. A short season Peach that succeeds in the far North. Very good quality, freestone, creamy white, red cheeked with a delicious white flesh.

HILEY. A large, good freestone. Flesh light yellow. Yellowish skin with deep red cheek. Delicious flavor and an early bearer.

EARLY ROSE. Similar to the Belle of Georgia, but earlier, harder and with pink-white flesh. Well adapted to cold, northern locations. Its quality and flavor are unsurpassed.

CARMAN. Probably the handsomest Peach grown. A red cheeked, golden yellow freestone of fine flavor and very juicy. An excellent shipper, ripening a good crop medium early.

Prices, each 35c; 10 for \$3.00; 100 for \$25.00. All charges prepaid.

Plums

BURBANK. Large, nearly round; clear cherry red with thin lilac bloom. Flesh deep yellow, rich, very sweet, and with a peculiar and agreeable flavor.

RED JUNE. The earliest Plum in cultivation, and usually a profitable variety in local markets. Bright red with light bloom; flesh light yellow, sweet and juicy. Of thoroughly good quality.

ARNDT. Rich cherry color with heavy white bloom. Large and showy. Small pit; light yellow flesh and of most delicious sweetness. Early and a heavy cropper.

WICKSON. Deep red, with yellow, sugary sweet flesh. Handsome in appearance and delicious in quality. The tree is of rapid growth and can be planted close together on account of its upright growth.

SHROPSHIRE DAMSON. One of the finest purple Plums grown; productive, hardy, and excellent for preserves.

Prices, on standard planting size, 3-ft. stock, each 90c; 10 for \$7.50; 25 or more 65c, each. All charges prepaid.

Cherries

EARLY RICHMOND. Everywhere the most popular. Tree a strong, thrifty grower making a large symmetrical head; fruit medium size, dark red, melting, juicy, with a sprightly acid flavor and especially valuable for canning. An early and abundant bearer, ripening in the last of May and first of June.

MONTMORENCY. A fine, large, red Cherry of the Richmond class, but larger and more solid. It is a more upright grower, equally hardy and productive. It ripens about ten days later than the Early Richmond, but is rapidly becoming the most popular market Cherry in its class. It is a dependable source of profit.

Prices, each 90c; 10 for \$8.00; 25 or more, 75c each. All charges prepaid.

THE PRESIDENT HARDING SWEET PEA

Named by Special
Permisson of the late

PRESIDENT OF THE UNITED STATES

The President Harding is an entirely new color in Sweet Peas.

Peach-red or salmon cerise suffused orange.

The President Harding is the greatest new Sweet Pea of the century and should be in the garden of every lover of Sweet Peas. It is the first American Sweet Pea to receive an Award from the English Sweet Pea Society and is without a doubt the most wonderful Sweet Pea ever produced.

The President Harding Sweet Pea was awarded the highest honors in both America and England. The American Sweet Pea Society gave it the **ONLY SILVER MEDAL** for the finest new Sweet Pea, making it the **FIRST AMERICAN SWEET PEA** and the National Sweet Pea Society of Great Britain gave it the **ONLY CERTIFICATE OF MERIT** for two years. The first American Sweet Pea that has even received an Award of Merit from the English Sweet Pea Society.

The blooms are well proportioned and of exquisite texture. Both the standard and wings are attractively waved and crimped and are magnificent in every way. The flowers are borne in profusion and nearly every stem has four large blooms. Pkt., 20c; 3 pkts., 50c; postpaid.

MAKES EVERYTHING GROW!

Wizard is a natural, weedless, concentrated manure that gives life and fertility to worn out soils. No matter what you grow you need Wizard for best results. Wizard is far superior to chemical stimulants or stable manure. It makes all plants grow to perfection. Wizard produces better lawns, better gardens and bigger crops. Wizard is the best for fruit and vegetable gardens insuring big crops of crisp, tender vegetables. Apply 10 lbs. to 100 square feet of garden and drill or broadcast 1000 to 1500 lbs. per acre.

Wizard is practical and profitable for both amateur and professional gardeners.

PRICES, not prepaid: 50 lbs., \$1.50; 100 lbs., \$2.50; 500 lbs., \$10.00; 1000 lbs., \$19.00; ton, \$36.00.

HALL'S TOBACCO DUST

KILLS THE BUGS

Destroys aphids and soft-bodied sucking insects. Particularly useful in gardens, and for vines, roses, etc., and for keeping all kinds of house plants free from insects and disease. It may be used for dusting and can be mixed with water and used as a spray.

2 lb., box, 60c, postpaid; 100 lb., sack, not prepaid, \$1.50.

STIM-U-PLANT

MAKES A WONDER GARDEN

Stim-U-Plant is the best plant food known, put up in tablet form. The tables may be placed in the ground near the roots where they will dissolve and feed the roots or used as a liquid fertilizer by dissolving in water. Stim-U-Plant is economical to use and one little tablet will do wonders as it is very powerful. Keep Stim-U-Plant on hand to use when wanted. It is Clean—Odorless—Handy to Use and always ready. Full directions with every package.

PRICE: Small size, 30 tablets, 25c; 100 tablets, 75c; 1000 tablets, \$3.50; postpaid.

MODEL GARDEN CLUB, PAW PAW, MICH.

Glorious GLADIOLI

With their wonderful range of color, nothing is finer for vases than a bunch of Gladioli. Even a single spike of bloom in a vase is a bouquet in itself. The flower develops to greater perfection if cut and placed in water than if left on the stem and will last for days. All bulbs guaranteed to bloom the first season.

AMERICA—Beautiful flesh pink, faintly tinged lavender. Large flowers. 6c each; 60c per dozen; \$4.00 per 100.
